RE: Application for Change in Point of Diversion  
Water Right, File No. 14715

Dear Mike:

We have completed a review of the application for the above referenced water right. The proposed change in point of diversion is in accordance with current area rules, K.A.R. 5-23-3, as it pertains to minimum spacing to neighboring wells and distance moved.

Well evaluations were not conducted to estimate possible effects of the proposal on the supply of other wells with water rights prior to the proposal per K.S.A. 82a-708b, and the management program. In this case, the current point of diversion was approved in 2022 with little pumping in 2022. With such a short time at the current location there is no history to determine effects. Also the proposal is to revert back to the previous location, which would be moving back to recent historic effects in the area. So it was determined that the analysis was not needed in this case.

Therefore, GMD3 sees this move as meeting current area rules and would recommend approval. If aquifer conditions change or there is a change to the water right in the future, we would be happy to evaluate the effects at that time.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

Jason L. Norquest
