RE: Field Office Application for Change
Water Right, File No. 29807

Dear Sir:

Enclosed is an order executed by the designee of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the application for change under the above referenced file number.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in these approvals for change. A condition of this approval is that an acceptable water flow meter must be installed on the diversion works authorized under the referenced file number and meet current specifications.

Please return the required notification of completion of the diversion works and installation of the required meter as soon as these actions are completed.

Since the order modifies the original document referred to above, it should be recorded with the Register of Deeds as other instruments affecting real estate.

The abandoned well must be plugged in accordance with the requirements of Article 30 of the Rules and Regulations as adopted by the Kansas Department of Health and Environment.

Should you have any questions, please feel free contact this office. If you would prefer, you could arrange an appointment for additional assistance.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael A. Meyer".

Michael A. Meyer
Water Commissioner

7. The changes herein are desired for the following reasons?
 (please be specific) Loss of production.

8. If a well, is the test hole log attached? Yes No

9. The change(s) (was)(will be) completed by?
Upon approval

10. If the point of diversion is a well:
 (a) What are you going to do with the old well?
Plug/cap
 (b) When will this be done? Upon completion

11. Groundwater Management District recommendation attached?
 Yes No

12. Assisted by EAV

13a. If the proposed point of diversion will be relocated more than 300 feet but within 2,640 feet of the existing point of diversion, attach a topographic map or aerial photograph. For groundwater sources, show all wells (including domestic) within one-half mile of the proposed point of diversion and the names and mailing addresses of the owners. For surface water sources, show the names and addresses of the landowner(s) one-half mile downstream and one-half mile upstream from your property lines

13b. If the proposed point of diversion will be relocated within a 300 foot radius of the existing point of diversion, indicate its location on the diagram shown above in relation to the existing point of diversion. The proposed point of diversion must be located within the circle shown above. **(PLEASE NOTE: The "X" in center of diagram above represents the presently authorized point of diversion.)**

14. If the proposed groundwater point of diversion is 300 or fewer feet from the existing point of diversion, complete the following:
- (a) Does the undersigned represent all owners of the currently authorized place(s) of use identified in this application?
 Yes No
 (If no, all owners must sign this application.)
 - (b) Will the ownership interest of any owner of the currently authorized place(s) of use identified in this application be adversely affected if this application is approved as requested?
 Yes No
 (If yes, all owners must sign this application.)
 - (c) If this application is not approved expeditiously, will there be substantial damage to property, public health or safety?
 Yes No
 (If no, all owners must sign this application.)
- If the application proposes a surface water change in point of diversion, a groundwater change in point of diversion greater than 300 feet, or a change in place of use, the application must be signed by all owners of the currently authorized place of use, or their duly authorized agent (attach notarized statement authorizing representation).

I hereby verify, being first duly sworn upon my oath or affirmation and under penalty of perjury, that I am of lawful age and the owner, the spouse of the owner, or a duly authorized agent of the owner(s) to make this application on their behalf, in regards to the water right(s) to which this application pertains. I further verify that the statements contained in this application are true, correct and complete.

SUMMARY ORDER APPROVING APPLICATION FOR CHANGE AND IMPOSING CONDITIONS

This Summary Order is issued under authority of K.S.A. 82a-708b, as amended, and K.A.R. 5-5-1, *et seq.* and other applicable provisions of the *Kansas Water Appropriation Law*, K.S.A. 82a-701 *et. seq.*, and rules and regulations promulgated thereunder. With the exception of those conditions expressly contained herein, this Summary Order does not change the terms, conditions and limitations of File No. 29807.

1. A change application was received on May 8, 2024 requesting that the place of use and / or point of diversion authorized under the above-referenced file number be changed as described in the application.
2. On and after the effective date of this summary order, the authorized place(s) of use shall be located substantially as shown on the topographic map accompanying the application to change the place of use. Applicable Not Applicable
3. The change in point of diversion shall not impair existing rights and shall be limited to the same source or sources of water as previously authorized. The point of diversion authorized by this summary order shall be located within a 50 foot radius of the authorized point(s) of diversion. Applicable Not Applicable
4. The point(s) of diversion described herein is administratively corrected to be more accurately described using the Global Positioning System (GPS), as described in the application. Applicable Not Applicable
5. The point(s) of diversion authorized herein shall not actually be located more than _____ feet from the previously authorized point(s) of diversion. Applicable Not Applicable
6. As required by K.A.R. 5-3-5d, if the works for diversion is a well with a diversion rate of 100 gallons per minute or more, a tube or other device suitable for making water level measurements shall be installed, operated and maintained in accordance with K.A.R. 5-6-13. Applicable Not Applicable
7. The owner of the authorized place(s) of use shall properly install an acceptable water flow meter on or before December 31, 2024, or before the first use of water, whichever occurs first. The water flow meter shall be installed, operated and maintained in accordance with K.A.R. 5-1-4 through 5-1-12. As required by K.S.A. 82a-732, as amended, and K.A.R. 5-3-5e, the owner shall maintain records and report the reading of the water flow meter and the total quantity of water diverted annually to the Chief Engineer by March 1 following the end of each calendar year.
 Applicable Not Applicable
8. Installation of the works for diversion of water shall be completed on or before December 31, 2024, or within any authorized extension of time. By March 1, 2025 the applicant shall notify the Chief Engineer that construction of the works for diversion has been completed, on the form provided by the Chief Engineer, as required by K.A.R. 5-8-4e.
 Applicable Not Applicable
9. The completed well log shall be submitted with the required notice. Applicable Not Applicable
10. All diversion works into which any type of chemical or other foreign substance will be injected into the water shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The check valve(s) shall be installed, operated and maintained in accordance with K.A.R. 5-3-5c. Applicable Not Applicable
11. Additional Conditions are attached. Yes No
12. In accordance with K.S.A. 82a-708a, as amended, and K.A.R. 5-5-14, all of the owners of the authorized place(s) of use of water appropriated under the above-referenced file number are responsible for compliance with its terms, conditions and limitations, as amended and/or supplemented by this Summary Order, and with applicable provisions of the *Kansas Water Appropriation Law* and the *Rules and Regulations* promulgated thereunder. Failure to comply with these provisions may result in civil penalties pursuant to K.S.A. 82a-737, as amended, and/or the suspension or revocation and dismissal of the water or appropriation right or any other enforcement actions authorized by law.

Administrative Appeal and Effective Date of Order

If you are aggrieved by this order, pursuant to K.S.A. 82a-1901, you may request an evidentiary hearing before the Chief Engineer or request administrative review by the Secretary of Agriculture. A request for hearing by the Chief Engineer must be filed within **15 days** of service of this Order and a request for administrative review by the Secretary must be filed within **30 days** pursuant to K.S.A. 77-531. Any request for administrative review must state a basis for review pursuant to K.S.A. 77-527. File any request with **Kansas Department of Agriculture, Legal Division, 1320 Research Park Drive, Manhattan, KS 66502**. Failure to timely request a hearing or review may preclude review under the Kansas Judicial Review Act.

FROM: Michael A. Meyer 
Water Commissioner

RE: Water Right, File No. 29807
Application for Change

Application for Approval to Change the Place of Use and / or Point of Diversion for the above referenced water right was reviewed for approval to relocate the authorized point of diversion. The application meets all rules and regulations. Review from the GMD3 showed potential effects of additional drawdown of static water level if the proposed location would be approved at current authority and model projections, only to the applicants nearby wells. These potential effects were somewhat mitigated with the applicant voluntarily reducing the authorized diversion to 650 GPM. They also supplied with their LLC, the statement below, that if there were any potential effects to their own nearby wells in the future from this proposal, that all wells were will always be in the LLC and never sold off to another water right owner.

SECTION 11

Non Severability of Land & Wells/Water Rights

11.1 TRL Land Co LLC agrees to not sever or separate NE 14-26-31, SE 11-26-31 and SW 12-26-31 from each other, neither the land nor the corresponding wells on them, through a sell or transfer. In the event they are separated from each other, Water Right 29807 would revert to its old place of use on SE 11-26-31 or if not possible, the water right would be forfeited.

The wells and tracts on NE 14-26-31, SE 11-26-31 and SW 12-26-31 will always remain joined legally under the same ownership.

Garrett Love

TRL Land Co, Partner

21506 12 Rd

Montezuma, KS 67867

With this documentation, the proposal, application will be further processed and shall meet all the criteria under K.S.A. 82a-708b.

Hey Mike,
We got this added to our operating agreement. See attached. And yes, dropping it to 650 GPM is fine.
Thanks!
Garrett Love

What about something in our by-laws or operating agreement indicating a requirement to keep these tracts/wells together?

We could also add a line that we agree that if separated, this approval would be null and void and revert back to its old place of use OR this water right would be forfeited?

Jason said they recommended it, pointing out surrounding wells were same owners and didn't receive any comments from neighbors. Is that right? Where does that put it in process?

Also, what is the status of Love Ag's application awhile back to flip water right from SW 7-27-28 and SE 12-27-29?

Thanks Mike!

Greg,

Below are summaries of the two changes that found significant concern on the impact of the drawdown that was evaluated on surrounding wells. This is mainly attributed to such low saturated thickness in the area. The amount of reduction needed to bring the impacts down are pretty significant for both proposals.

We already spoke about WR 14536 back in October of last year but here are the numbers again.

More Quantity 1. (110 AF at 74 GPM) and More Rate 2. (20 AF at 237 GPM). We can go anywhere between those numbers.

Understandably, if this is too great of a reduction and would not be worth it to redrill at this location, we can explore other options such as a <300 ft. move that does not require theis evaluations or somewhere else within the area. Note: due to the reduction in quantity, the total group acres will have to be reduced down as well in order to not increase consumptive use depending on the quantity you select.

We have not spoken about WR 27546 as I just got the numbers back not to long ago. Here they are.

More Quantity 1. (214 AF at 189 GPM) and More Rate 2. (50 AF at 394 GPM). We can go anywhere between those numbers.

Understandably, if this is too great of a reduction and would not be worth it to redrill at this location, we can explore other options such as a <300 ft. move that does not require theis evaluations or somewhere else within the area. Note: depending on the reduction in quantity, the total group acres will have to be reduced down as well in order to not increase consumptive use depending on the quantity you select.

Feel free to call or email with any questions.

RE: Application for Change in Point of Diversion
Water Right, File Nos. 29807

Dear Mike:

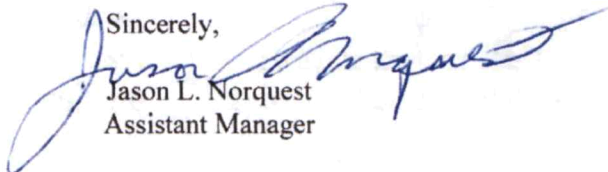

We have completed a review of the application for the above referenced water right. The proposed change in point of diversion is in accordance with current area rules, K.A.R. 5-23-3, as it pertains to minimum spacing to neighboring wells and distance moved.

Well evaluations were conducted to estimate possible effects of the proposal on the supply of other wells with water rights prior to the proposal per K.S.A. 82a-708b, and the management program. Under K.S.A. 82a-708b, an applicant requesting a change in point of diversion must demonstrate to the chief engineer that any proposed change is reasonable and will not impair. The enclosed report is an analysis performed by the GMD on behalf of our membership. Under this analysis, the proposed change is considered to be reasonable and unlikely to impair if either the net in-season well-to-well effect of the proposed change is less than a strict maximum allowable threshold (3.0 ft with saturated thickness is between 125-150ft), or if no well with a net well-to-well effect exceeding the threshold is identified as critical. Critical wells are identified as wells that are expected to either lose or greatly diminish water supply over the next 25 years. The attached review information is based on a Theis analysis using inputs from the GMD3 aquifer model, which is considered to be the best information on well and aquifer data readily and easily available to the public. If either the applicant or the neighbors believe they have better data that might change the result of the analysis, they should contact GMD3. Conclusions of the well analysis may change if better information on well and aquifer data can be made available.

Every neighboring well within 1 mile of the proposed move was evaluated. Evaluations showed that some of the neighboring wells exceeded the net effect above the maximum allowable threshold and needed further evaluation. Critical wells were determined possible in the area if the proposed well is pumped at full authority. Part of the effects can be attributed to the fact that the area has a relative small saturated thickness currently so even effects that look minimal can have effects. We did not receive any comments from neighboring well owners. Therefore, GMD3 sees these moves as meeting current rules and would recommend approval if the State concurs that neighboring wells are not adversely affected. If aquifer conditions change or there is a change to the water right in the future, we would be happy to evaluate the effects at that time.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

Jason L. Norquest
Assistant Manager

Authorized: 225AF @ 922gpm

Proposed reduction to 200AF in order to reduce minimum spacing requirements to one of their own wells.

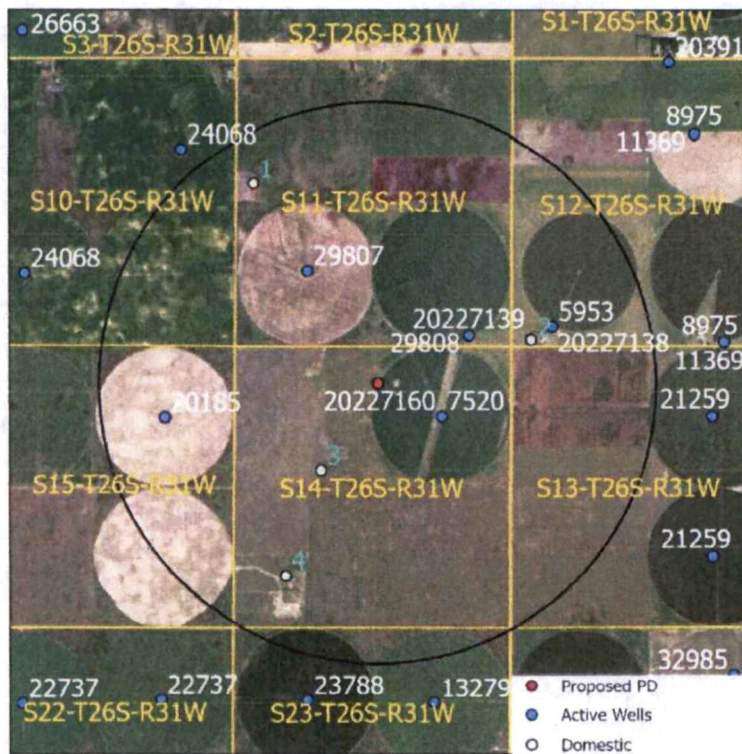

Is a waiver needed: Move less than half mile. After reducing to 200AF, minimum spacing appears met. Analysis shows the affects appear small, but the area is in a low saturated area and could be noticeable if pumped at full authority.

Recommendation: After review of available information, it appears current area rules are met. Proposed move could have possible effects. Staff would recommend approval of the application if State agrees effect are not excessive and the reduction does occur.

Evaluation of proposed move for Water Right No. 29807

Proposed: Move Water Right No. 29807 to a new location 2505 ft to the southeast.

Wells within 1 mile: 29808, 5953, 20158, 7520, and four domestic wells, numbered on the above map.

The saturated thickness at the proposed well location is estimated to be 128 ft, based upon the GMD3 model. For saturated thickness between 125 ft and 150 ft, the drawdown allowance is 3.0 ft.

50 year Theis Analysis: The following values were used to run the analysis:

$S = 0.1214$, $T = 3790 \text{ ft}^2/\text{day}$, $t_{p\text{current}} = 90 \text{ days}$, $Q_{\text{current}} = 100 \text{ gpm}$, $t_{p\text{proposed}} = 57 \text{ days}$, $Q_{\text{proposed}} = 900 \text{ gpm}$

Theis drawdowns were calculated as follows:

29808: Drawdown from current location = 0.54 ft
Drawdown from proposed location = 4.61 ft
Net drawdown = **4.1 ft**

5953: Drawdown from current location = 0.42 ft
Drawdown from proposed location = 2.92 ft
Net drawdown = **2.5 ft**

20185: Drawdown from current location = 0.48 ft
Drawdown from proposed location = 2.65 ft
Net drawdown = **2.2 ft**

7520: Drawdown from current location = 0.49 ft
Drawdown from proposed location = 6.15 ft
Net drawdown = **5.67ft**

Domestic 1: Drawdown from current location = 0.78 ft
Drawdown from proposed location = 2.53 ft
Net drawdown = **1.7 ft**

Domestic 2: Drawdown from current location = 0.44 ft
Drawdown from proposed location = 3.26 ft
Net drawdown = **2.8 ft**

Domestic 3: Drawdown from current location = 0.49 ft
Drawdown from proposed location = 4.66 ft
Net drawdown = **4.2 ft**

Domestic 4: Drawdown from current location = 0.37 ft
Drawdown from proposed location = 2.68 ft
Net drawdown = **2.3 ft**

Net drawdown exceeds the drawdown allowance for the wells authorized under water right nos. 29808, 7520, as well as Domestic 3. Critical well analysis was performed for those wells.

20185: Drawdown from current location = 0.48 ft
Drawdown from proposed location = 2.65 ft
Net drawdown = **2.2 ft**

7520: Drawdown from current location = 0.49 ft
Drawdown from proposed location = 6.15 ft
Net drawdown = **5.67ft**

Domestic 1: Drawdown from current location = 0.78 ft
Drawdown from proposed location = 2.53 ft
Net drawdown = **1.7 ft**

Domestic 2: Drawdown from current location = 0.44 ft
Drawdown from proposed location = 3.26 ft
Net drawdown = **2.8 ft**

Domestic 3: Drawdown from current location = 0.49 ft
Drawdown from proposed location = 4.66 ft
Net drawdown = **4.2 ft**

Domestic 4: Drawdown from current location = 0.37 ft
Drawdown from proposed location = 2.68 ft
Net drawdown = **2.3 ft**

Net drawdown exceeds the drawdown allowance for the wells authorized under water right nos. 29808, 7520, as well as Domestic 3. Critical well analysis was performed for those wells.

Critical Well Evaluation:

29808:

Water Column = 90 ft

DP = 4.1 ft (Net drawdown from the proposal indicated above)

DE = 45 ft (Water level decline from 2024 through 2049 based upon GMD3 model)

DD = 20 ft (S = 0.1897, T = 3369 ft²/day, Q = 200 gpm, tp = 121 days, efficiency = 70%)

DT = 69.1 ft

Economic Drawdown Constraint (EDC) = 0.4 * 90 ft = 36 ft

Physical Drawdown Constraint (PDC) = 90 ft – 60 ft = 30.0 ft

Total drawdown of 69.1 ft is greater than the EDC and the PDC, so this well **is critical**.

7520:

Water Column = 128 ft

DP = 5.7 ft (Net drawdown from the proposal indicated above)

DE = 47.1 ft (Water level decline from 2024 through 2049 based upon GMD3 model)

DD = 35.3 ft (S = 0.1214, T = 3790 ft²/day, Q = 400 gpm, tp = 64 days, efficiency = 70%)

DT = 88.1 ft

Economic Drawdown Constraint (EDC) = 0.4 * 128 ft = 51.2 ft

Physical Drawdown Constraint (PDC) = 128 ft – 60 ft = 68 ft

Total drawdown of 88.1 ft exceeds the EDC and the PDC, so this well **is critical**.

Domestic 3:

Water Column = 128 ft

DP = 4.2 ft (Net drawdown from the proposal indicated above)

DE = 47.1 ft (Water level decline from 2024 through 2049 based upon GMD3 model)

DT = 51.3 ft

Economic Drawdown Constraint (EDC) = 0.4 * 128 ft = 51.2 ft

Physical Drawdown Constraint (PDC) = 128 ft – 20 ft = 108 ft

Total drawdown of 51.3 ft exceeds the EDC, so this well **is critical**.

Conclusion:

The proposed move is in a declining aquifer area with about 120 ft of remaining saturated thickness. The analysis shows that net well-to-well effects created by this proposal are likely to be small but noticeable to the nearest wells, due to the limited amount of remaining aquifer. Three nearby wells were flagged as critical because projected aquifer declines over the next 25 years amount to more than 40% of the remaining saturated thickness. Concerned neighbors should contact GMD3 at (620) 275-7147 or the Division of Water Resources at (620) 276-2901.

Re: Request for Recommendation
Water Right, File No. 29807

Dear Mr. Norquest:

This is to advise you that TRL Land Co LLC has filed an application for approval of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, to change the point of diversion.

We are delaying action on the change application to allow you time to review and provide a recommendation. Please submit a recommendation within 15 days from the date of this letter.

Thank you and as always feel free to contact this office at any time.

Sincerely,

A handwritten signature in blue ink that reads "Michael A. Meyer". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
