FROM: Brent A. Turney

RE: Water Right
File No. 19,521 D1

Loren A. and Veleeta Doll on behalf of Willroads Feedyard, owners of the referenced water right, has filed an application for approval to change the place of use and use made of water for Water Right, File No. 19,521 D1, filed on February 27, 2017. File No. 19,521 D1 is currently authorized for irrigation use. The referenced water right has a total of 200 acre-feet of groundwater for irrigation use and does not appear to be abandoned as per K.S.A. 82a-718.

File No. 19,521 D1 is authorized one well (authorized 200 acre-feet) for the irrigation of a 140 acre place of use there are no overlaps in the place of use, and one well (authorized 200 acre-feet) for irrigation use, there are no overlaps in the point of diversion. The application requests a dual use of water that will allow for the use of up to 178.8 acre-feet for both stockwatering use and irrigation use in any calendar year. The application further requests that the quantity of water be only limited to 178.8 acre-feet rather than be reduced.

The application proposes a limited amount of 178.8 acre-feet per calendar year, a 10.6 percent limitation based upon the proposed return flow credit of KAR 5-5-9. The authorized quantity for the referenced file will remain 200 acre-feet, however, it will be limited to 178.8 acre-feet until such a time the additional stockwatering quantity is no longer desired. Based upon revised KAR 5-5-9 there will be no reduction in the number of acres that may be irrigated due to the change in the use made of water.

The applicant has submitted justification that the requested quantity (178.8 AF) in addition to the existing stockwatering water rights is reasonable to water 12,800 head of cattle.

The applicant has identified all wells within one half mile and has stated that he owns all of them, therefore no nearby notices have been sent.

In a letter dated July 6, 2017, Jason Norquest, Assistant Manager of Southwest Kansas Groundwater Management District No. 3, indicated that application complies with the current management program and he further recommends approval of the application.

In an e-mail dated August 3, 2017, Jeff Lanterman, Water Commissioner, Stafford Field Office, indicated that he is not opposed to approval of the application.

Water flow meters are required. Check valves are required if any chemical or foreign substance is injected into the water through the diversion works

Based on the above discussion, that impairment to existing water rights is unlikely, and that no change in the local source of supply will occur, the change may be approved.

RE: Water Right
File No. 19,521 D1

Dear Mr. Doll:

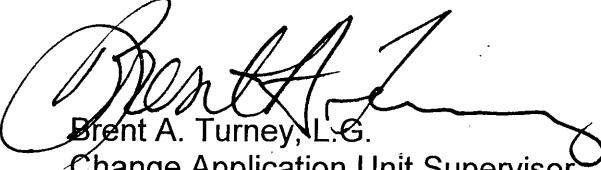

Enclosed is the order executed by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the application for change under the above referenced file.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in the approvals for change. A condition of the approvals is that acceptable water flow meters must be installed so that both irrigation and stockwatering uses can be metered independent of each other. Please return the required notification of installation of the required meter as soon as these actions are completed.

Since this order modifies the original document referred to above, it should be recorded with the Register of Deeds as other instruments affecting real estate.

If you have any questions, please contact this office. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A. Turney, L.G.

**APPROVAL OF APPLICATION
 FOR
 CHANGE IN PLACE OF USE
 USE MADE OF WATER AND ORDER
 IN THE MATTER OF THE
 AUTHORIZED QUANTITY OF WATER
 WATER RIGHT
 FILE NO. 19,521 D1**

The Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, after due consideration of the written application of Loren A. and Veleeta Doll, on behalf of Wilroads Feedyard, 11449 Lariat Way, Dodge City, Kansas 67801, received in this office on December 27, 2016, for approval of a change in the place of use and use made of water under the certificate of appropriation issued pursuant to the application for permit to appropriate water for beneficial use, as modified and amended by the order of the Chief Engineer dated May 16, 1980, approving the application to change the authorized place of use, and the order of the Chief Engineer dated September 17, 2012, determining the interest in Water Right, File No. 19,521, finds that the changes are reasonable and will not impair existing rights and that the applications should be and are hereby approved.

The authorized quantity under this water right will remain 200 acre-feet (65.17 million gallons). This order effectively limits the authorized quantity of water to 178.8 acre-feet (58.26 million gallons) per calendar year for both stockwatering and irrigation uses combined. That the limitation on the quantity of water shall exist until such a time that the quantity of water for stockwatering use authorized by this approval is no longer required.

The effective date of the change shall be the date this order is executed by the Chief Engineer, after which that portion retained for irrigation use shall be authorized a quantity not to exceed:

178.8 acre-feet (58.26 million gallons) of groundwater per calendar year,

for irrigation use on the following described property:

Sec.	Twp.	Range	NE¼				NW¼				SW¼				SE¼				TOTAL		
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼			
8	27S	24W			1	19											40	12	1	16	89
9	27S	24W							13			25	6								44

a total of 133 acres in Township 27 South, Range 24 West, Ford County, Kansas, and

That portion changed to stockwatering use shall be authorized a quantity not to exceed:

58.26 million gallons (178.8 acre-feet) of groundwater per calendar year,

the location of the place of use shall be:

a feedlot located in the Southwest Quarter (SW¼) of Section 4, the Northeast Quarter of Section 8, and the West Half (W½) of Section 9, all in Township 27 South, Range 24 West, Ford County, Kansas, and

the point of diversion is better described as being:

one well located in the Northeast Quarter of the Northeast Quarter of the Southeast Quarter of Section 8, more particularly located near a point 2,077 feet North and 411 feet West of the southeast corner of said section, Township 27 South, Range 24 West, Ford County, Kansas,

located substantially as shown on the topographic map accompanying the application to change the place of use and use made of water.

All diversion works into which any type of chemical or other foreign substance will be injected into the water pumped from the diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer.

The water right owner shall properly install a separate acceptable water meter for each use made of water for the diversion works authorized under this water right, prior to the use of water, in strict accordance with the Kansas Administrative Regulations 5-1-4 through 5-1-12 adopted by the Chief Engineer. The water right owner shall notify the Chief Engineer when installation of the water meters has been completed. The water right owner shall maintain the water meters in an operating condition satisfactory to the Chief Engineer, at all times during diversion of water and shall maintain records from which the total quantity of water diverted for irrigation and stockwatering use may be determined. The water right owner shall also report the reading of said water meters and the total quantity of water diverted annually to the Chief Engineer. Such records shall be furnished to the Chief Engineer by March 1 following the end of each calendar year.

The Chief Engineer specifically retains jurisdiction in this matter with authority to review the approval of the additional well at intervals of no fewer than five years, and no more than ten years to determine if the total annual quantity of water actually being withdrawn by all wells authorized by the approval of application for change is exceeding the total annual quantity of water that could have been physically withdrawn if the additional well had not been approved, and based on the review, the Chief Engineer retains authority to make a reasonable reduction in the authorized quantity of water as may be deemed to be in the public interest.

In all other respects, the Certificate of Appropriation issued pursuant to Approval of Application, File No. 1,395, for permit to appropriate water for beneficial use, is as stated and set forth in the Certificate of Appropriation dated April 30, 1957, and as modified by the aforementioned orders.

RIGHT TO A HEARING AND TO ADMINISTRATIVE REVIEW

If you are aggrieved by this Order, then pursuant to K.S.A. 82a-1901, you may:

- 1) request an evidentiary hearing before the Chief Engineer, or
- 2) request administrative review by the Secretary of Agriculture.

Failure to request an evidentiary hearing before the Chief Engineer does not preclude your right to administrative review by the Secretary.

To obtain an evidentiary hearing before the Chief Engineer, a written request for hearing must be filed within 15 days after service of this Order as provided in K.S.A. 77-531 (**i.e., within a total of 18 days after this Order was mailed to you**), with: Kansas Department of Agriculture, Attn: Legal Section, 1320 Research Park Drive, Manhattan, KS 66502, FAX (785) 564-6777.

If you do not file a request for an evidentiary hearing before the Chief Engineer, you may petition for administrative review of the Order by the Secretary of Agriculture. A petition for review shall be in writing and state the basis for requesting administrative review. The request for hearing may be denied if the request fails to clearly establish factual or legal issues for review. See K.S.A. 77-527. The petition must be filed within 30 days after service of this Order as provided in K.S.A. 77-531 (i.e., **within a total of 33 days after this Order was mailed to you**), and be filed with: Secretary of Agriculture, Attn: Legal Division, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, KS 66502, FAX (785) 564-6777.

If neither a request for an evidentiary hearing nor a petition for administrative review is filed as set forth above, then this Order shall be effective and become a final agency action as defined in K.S.A. 77-607(b). Failure to timely request either an evidentiary hearing or administrative review may preclude further judicial review under the Kansas Judicial Review Act.

Any request for hearing or petition for administrative review shall be in writing and shall be submitted to the attention of: Chief Legal Counsel, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502, Fax: (785) 564 – 6777.

Any request for hearing or petition for administrative review shall be in writing and shall be submitted to the attention of: Chief Legal Counsel, Kansas Department of Agriculture, 109 SW 9th Street, 4th Floor, Topeka, Kansas 66612, Fax: (785) 368-6668.

Ordered this 18th day of August, 2017, in Topeka, Shawnee County, Kansas.

12. The presently authorized use of water is for Irrigation purposes.
It is proposed that the use be changed to Irrigation & Stockwater purposes.
13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased.
This request proposes to convert the use at the north well to both stockwater and irrigation use. There will be a consumptive use reduction on the authorized irrigation quantity in order to comply with the nutrient management plan that utilizes the return water of the feedlot back to irrigation and retain the current project and acres. The stockwater rights' use and quantities will not be changed. Consumptive Use: ~~136 perfecton acres x 1.14' = 155.04 AF per K.A.R. 5-5-9(a)(1).~~
(Please show any calculations here.) 178.8 AF PROPOSED KAR 5-9*
14. It is requested that the maximum annual quantity of water be reduced to ~~155.04~~ 178.8* (acre-feet or million-gallons).
15. It is requested that the maximum rate of diversion of water be reduced to NA gallons per minute (--- c.f.s.).
16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.
- If a change in the location of the point(s) of diversion is proposed, show:
 - The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.
 - If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within 1/2 mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within 1/2 mile, please indicate so on the map.
 - If the source of supply is surface water, the names and mailing addresses of all landowner(s) 1/2 mile downstream and 1/2 mile upstream from your property lines must be shown.
 - If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.
17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.
Same local source of supply. **The applicant requests that they retain the original 200 AF for irrigation, but will limit the stockwater quantity to ~~155.04~~ 178.8* AF during the duration of the dual use stockwater/irrigation permit. Should the stockwater use ever cease, the applicant will request to revert back to irrigation for the full original quantity of 200 AF. For the proposed change, the applicant requests that 200 AF be permitted for Irrigation and Stockwater and to not single out a quantity per use. Each use will be metered separately at the point of diversion.
18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.

No waivers are anticipated.

Name of Applicant (Please Print): WILROADS FEED YARD

1. Please indicate type of livestock (cattle, hogs, etc.): CATTLE

2. Please complete the following table showing past and present water requirements:

PAST NUMBER OF HEAD AND WATER DIVERTED, IF APPLICABLE

LAST 5 YEARS	NUMBER OF HEAD	WATER DIVERTED (GALLONS)	GALLONS PER HEAD PER DAY
5 years ago	11,123	46,824,240	11.5
Last year	7,826	34,782,080	12.2
Present Year	9,760	44,041,790	12.4

3. Please complete the following table showing estimated future water requirements:

ESTIMATED FUTURE NUMBER OF HEAD AND WATER DIVERTED

NEXT 5 YEARS	NUMBER OF HEAD	WATER TO BE DIVERTED (GALLONS)	GALLONS PER HEAD PER DAY
Year 1	11,500	52,468,750	12.5
Year 2	11,500	52,468,750	12.5
Year 3	11,500	52,468,750	12.5
Year 4	11,500	52,468,750	12.5
Year 5	11,500	52,468,750	12.5

Please attach any additional information, tables, or curves showing past, present and estimated future water requirements to substantiate the amount of water requested.

4. Please designate the legal description of the location where the water is to be used. Show in the space provided below the Section (S), Township (T), and Range (R), and the number of acres in each forty acre tract or fractional portion thereof.

S	T	R	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	

*** PLEASE SEE SEPARATE SHEET WITH INFORMATION FOR WATER RESOURCES RECEIVED**
ITEM No. 4.

5. Show quantities of water used and all associated water uses at the feedlot such as water used in feed mills, cooling of animals, washing, flushing of wastes, etc.:

DRINKING

9760 head of CATTLE x 12.4 gallons/head (avg.) x 365 days = 44.04 MILLION gallons
 _____ head of _____ x _____ gallons/head (avg.) x _____ days = _____ gallons
 _____ head of _____ x _____ gallons/head (avg.) x _____ days = _____ gallons

COOLING

0 gallons/hour x _____ hour/day x _____ days = _____ gallons

SANITATION

0 g.p.m. x 60 min/hr x _____ hr/wk x _____ wks/yr = _____ gallons

OTHER USE (Explain) _____ = _____ gallons

TOTAL ----- 44,041,790 gallons

6. Show location of present and future location of confinement pens on your attached maps or photographs.
NO EXPANSION PLANNED. SEE ATTACHED MAP OF CURRENT FACILITY, SEC. 9-27-24W, FORD COUNTY, KS.
7. Total feed bunk space for cattle or livestock is 13,900 linear feet.
8. Total size of stock pens for confinement area of cattle, hogs, etc. is 2,580,500 square feet.

You may attach any additional information you believe will assist in informing the Division of Water Resources of the need for your request.

PLEASE SEE ATTACHED COVER LETTER CONTAINING ADDITIONAL CATTLE FEEDING INFORMATION SPECIFIC TO WILROADS FEED YARD AND STOCK WATER USAGE.

4. It is proposed that the place of use be changed to:

Owner of Land — NAME: Loren & Veleeta Doll

Any use of water that is not as authorized by the water right or permit to authorize water **before** the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than \$100 nor more than \$1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

Dated at FORD COUNTY, Kansas, this 22 day of DECEMBER, 2016.

Popping this up to the top. We really need to address this.

We can help them fill out a term or even temporary permit but working this app seems like the best way to go.

Subject: FW: Wilroads Feed Yard Stock Water
Importance: High

Lane got a bit of an emergency brewing at Willroads Gardens feedlot.

These people are in dire need of some water at the feedyard. We have a change in. The change was filled out with old CU rules but GMD #3 recommended approval and said use the map. We filled it out for them before we all decided to start using the map. They state they are about 7 days till some of their wells are out of water. One is in a myfa.

I support using the map.

They are asking if they can get a term or temporary because they are going to be out of water soon. That doesn't make any sense to me to try to approve a term or temporary when we have this change app already submitted with a GMD recommendation.

I can tell them to pump and wait for the change approval but I have gotten in trouble doing that before.

What do you think? Can we bump this to the top of the line, process it using the new CU map? Waiving the current 5-5-9 in favor of the mapped proposal and draft regs?

Thanks
Jeff

Hey Brent,

I know you have been out a lot lately, but do you have an idea on how long before we might see an approval on the dual use change for 19521-D1? I need to get back to John's email soon. Thanks.

Elizabeth

From: John Oldham [<mailto:joldham@starrtech.net>]
Sent: Monday, July 17, 2017 10:47 AM

To: Fitch, Elizabeth <Elizabeth.Fitch@ks.gov>; Jason Norquest <norquest@gmd3.org>
Subject: Wilroads Feed Yard Stock Water

Elizabeth & Jason,

I received stock water meter readings from the WFY manager this morning that were taken on Friday. Based on current usage, we are now within approximately 7-10 days of over-pumping WR File No. 45,904. The feed yard has tried to use WR File No. 38,161 (currently in the MYFA) sparingly, but with increased demand from higher temperatures, it is not possible to keep it shut down. There is currently 880,000 gallons remaining in the MYFA.

Based on the preparation of the dual-use permit application by Elizabeth and the recommendation for approval from GMD#3 written by Jason, I can see you have done everything possible to help us resolve our stock water situation at WFY. However, we are critically close to needing to shut these wells down to stay in compliance with remaining available quantities, but with live cattle on feed we know that is not a possibility. Therefore, please advise on what we need to do to avoid putting our current rights in jeopardy and being sanctioned or fined. We would like to avoid extending the perfection period for all wells in the feed yard, but we will follow whatever course of action is necessary.

Once again, thank you for all of your input and assistance in helping us try to resolve our issues. I will look forward to hearing back from you as to what our next move needs to be.

Thanks,
John

John, I have attached my review material that I sent to DWR yesterday. I tried to send it to you yesterday as well, but got a message it was undeliverable, so I hope this works. I recommended approval of the application, with an additional recommendation that you be allowed to use the proposed consumptive use percentage and then be able to keep another 20AF for the dual use. If I can push it along, I will do what I can. Keep me posted.

Sent: Thursday, July 06, 2017 11:14 AM
To: Jason Norquest <norquest@gmd3.org>
Subject: Wilroads Feed Yard Stock Water

Jason,

After checking with the feed yard manager, WR File No. 38,161 (MYFA POD) and WR File No. 45,904 are both currently online to meet demands in the yard. He tells me we have less than three (3) weeks before we have to shut 38,161 down in order to not over-pump. We understand we absolutely cannot exceed the available quantity on the MYFA. With current head counts and temperatures, 45,904 will have trouble supplying the needed demand. In addition, we only have about three weeks available quantity on it until we exceed the annual available quantity there, too.

As you can see, we will need specific direction from GMD#3 and DWR as how to proceed to avoid over-pumping and also to avoid any further adverse consequences to our water rights. I greatly appreciate your assistance.

Thanks,
John

RE: Change Application
Water Right, File No. 19521D1

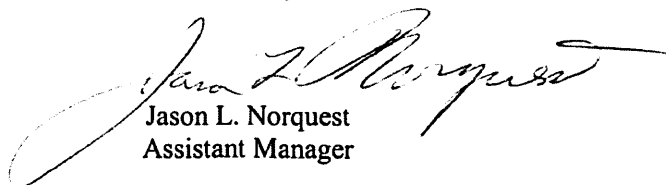

Dear Brent:

We have completed a review for the above referenced application. The proposal to change the water right to a dual use right for IRR/STK and make a complete overlap in place of use to include the pens is not in conflict with the Management Program of the Southwest Kansas Groundwater Management District No. 3 (GMD3). The change in place of use is in accordance with K.A.R. 5-5-11 and the proposed dual use is in accordance with the current consumptive use calculation in K.A.R. 5-5-9.

We believe this would benefit the applicant in meeting their stock water needs and at the same time, allow them to continue to best manage their effluent program on the land. Seeing as how there is a pending change in the consumptive use formula for K.A.R. 5-5-9, we recommend that the applicant be granted the ability to use the proposed 10.6% calculation for Ford County and be permitted for 178.8 acre feet on the dual use right instead of the 155.04 acre feet under the current calculation. This proposed calculation has been used in the recent past by applicants in our District. Information provided in the application shows that the applicant does not need a lot of additional stock authority to meet current capacity needs. Seeing as how this is located within the Ark River IGUCA, it would be in the best interest to be able to keep as much irrigation right as they can in order to protect from leaching and other adverse effects if they cannot manage their nutrients properly. We have also worked with the applicant with programs such as the Multi-Year Flex, which has allowed them to get their irrigation applications and crop management more efficient. The applicant is fully aware of the need to utilize two flow meters, one for each use, in order to keep accurate records. We also support the ability to go back to full irrigation in the future if stock watering is no longer needed from this well.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

Jason L. Norquest
Assistant Manager

GMD3 Change Review

Change Application(s); UMW, Dual use proposed
File No(s). 19521D1, Wilroads Feedyard
SEE ATTACHED MAP

Applicant is proposing to make this a dual use well for IRR/STK. Taking the consumptive use reduction upfront in order to have either use on the well. Still being able to water the ground with fresh water to offset the effluent used while creating another source of water for STK to correct past problems of overpumping some of the STK wells. Application would reduce the water right from 200AF currently to 155.04AF dual use. THE APPLICANT REQUESTS THE ABILITY TO GO BACK TO 200AF IF THEY DECIDE TO STOP USING IT FOR STK ALSO.

NOTE: if the rule for consumptive use changes as proposed by the State, the conversion would only reduce the water right to 178.8AF.

Had conversations with John Oldham and worked with them in the past to get their water rights in order and implement best practices for their operation.

BOTH USES WOULD BE METERED SEPARATELY.

Neighboring wells: Spacing is met

Domestic wells: None in area of concern

Regulation(s) Reviewed: KAR 5-5-9

Board Review Date: NA

Board Recommendation: NA

Waiver Reason: NA

Final Recommendation: After review of all available information and discussion with the applicant, staff recommends approval of the application, with the modification that the applicant be allowed to use the proposed change in consumptive use calculations, which will have a public hearing in the near future.

Good afternoon Brent, I hope you had a good 4th of July. Attached is the review material for this application. Our office has been an advocate for dual use permits, such as this, and do support it. Our Board has also been somewhat supportive of the proposed change in the consumptive use calculation in KAR 5-5-9 and the use of the proposed percentage map that has a public hearing in the near future. After a phone conversation with John, he stated that he was going to need to know prior to the proposed rule change taking effect, if this change was approved. In a case such as this, we feel it is in the best interest if the applicant can use the proposed formula in order to not only meet the small amount of additional stock authority to meet their needs, but also be sure they have the irrigation authority to maintain proper nutrient management on the farm ground seeing as how this is within the Ark River IGUCA. We have worked with Wilroads Feedyard in the past to correct past water management and feel they have a good foundation to use their water efficiently for both uses. A hard copy of the letter will be in the mail. If you have any questions, please feel free to contact me at your convenience.

Have a good day.

Re: Water Right, File No. 19521-D1, Change the Place of Use Application

Dear DWR:

Please find enclosed the completed Stock Water Supplemental Sheet that was requested to be submitted back with our original application for change the place of use / dual use irrigation and stock water permit. This is in reference to the letter we received that was dated 1/27/17 from Austin McColloch.

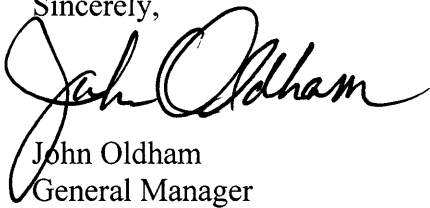

In addition, here is some additional information that will help you understand the need for the permit we have applied for:

- Wilroads Feed Yard is currently permitted for 12,800 head of beef cattle. There are no plans to expand the current permitted allowed occupancy.
- At capacity, with an average water consumption rate at 12.0 gallons per head per day, stock water needs would be 56 million gallons. WFY is currently permitted to pump 44.155 million gallons.
- Average consumption rates have increased from 11.5 GPHPD (gallons per head per day) five (5) years ago to 12.4 GPHPD in 2016. We believe this is mainly due to finished live animal weights increasing from an average of 1,250 pounds to 1,450 pounds in that same time frame.
- Due to logistical reasons, WFY has never been able to fully utilize allotments from certain wells making up the entire battery of stock water within WFY. This is due to location, elevation differences, and physical capacity. WFY has a history of over-pumping certain wells within the yard, but new management was put in place in late 2014, and new measures have been implemented to manage individual well usage to greater efficiencies and eliminate over-pumping.
- Average occupancy at WFY in 2015 was 7,826 head. In 2016, occupancy increased to an average of 9,760 head, with the actual number of COF (cattle on feed) averaging 10,561 in the last six (6) months of the year.

- Cattle inventory in the United States in 2015 was at 88.5 million head, increasing by over 5 million head to 93.6 million head in 2016. It is anticipated the increase in 2017 will be just as aggressive.
- WFY currently has 11,043 COF, and we anticipate that yard occupancy will continue to stay at or increase above current levels based on overall inventory supplies for several years to come. Again, WFY is permitted for 12,800 head.
- Using conservative figures of 11,500 COF with a stock water consumption rate of 12.5 GPHPD would equal annual usage of 52.5 million gallons. That exceeds our current total available stock water by 8.35 million gallons.

I hope you find this information helpful and complete in order for you to process our current application. If you have any further questions or need additional information, please contact me at the return address listed above or by telephone at (620) 227-2405.

Sincerely,

John Oldham

RE: Change Application
Water Right, File No. 19521D1

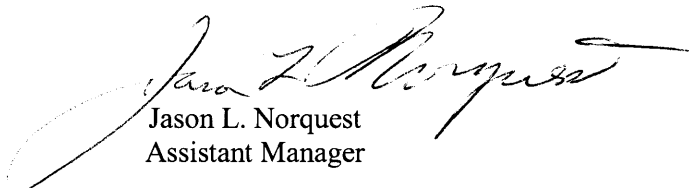

Dear Brent:

We have completed a review for the above referenced application. The proposal to change the water right to a dual use right for IRR/STK and make a complete overlap in place of use to include the pens is not in conflict with the Management Program of the Southwest Kansas Groundwater Management District No. 3 (GMD3). The change in place of use is in accordance with K.A.R. 5-5-11 and the proposed dual use is in accordance with the current consumptive use calculation in K.A.R. 5-5-9.

We believe this would benefit the applicant in meeting their stock water needs and at the same time, allow them to continue to best manage their effluent program on the land. Seeing as how there is a pending change in the consumptive use formula for K.A.R. 5-5-9, we recommend that the applicant be granted the ability to use the proposed 10.6% calculation for Ford County and be permitted for 178.8 acre feet on the dual use right instead of the 155.04 acre feet under the current calculation. This proposed calculation has been used in the recent past by applicants in our District. Information provided in the application shows that the applicant does not need a lot of additional stock authority to meet current capacity needs. Seeing as how this is located within the Ark River IGUCA, it would be in the best interest to be able to keep as much irrigation right as they can in order to protect from leaching and other adverse effects if they cannot manage their nutrients properly. We have also worked with the applicant with programs such as the Multi-Year Flex, which has allowed them to get their irrigation applications and crop management more efficient. The applicant is fully aware of the need to utilize two flow meters, one for each use, in order to keep accurate records. We also support the ability to go back to full irrigation in the future if stock watering is no longer needed from this well.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

Jason L. Norquest
Assistant Manager

Re: Water Right
File No. 1,9521-D1

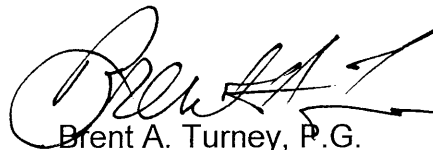

Dear Sir or Madam:

We are enclosing a copy of the application referred to above, received in the office of the Chief Engineer December 27, 2016, which appears to be in proper form.

We are delaying any further action for a period of 15 days from the date of this letter to allow you time to submit your recommendation concerning this application.

Please submit your recommendation within the allotted time, or any authorized extension of time thereof. If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A. Turney, P.G.

RE: Water Right, File No. 19,521-D1

Dear Sir or Madam,

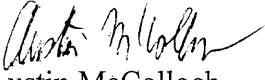

Reference is made to the Application to Change the Place of Use and Use Made of Water, Water Right, File No. 19,521-D1 received in the office of the Chief Engineer on December 27, 2016. Upon review of the application, we find that the following issue must be resolved in order to continue processing the change application.

- There is no information in your application justifying the additional quantity of water requested for the feedlot. I have enclosed a *Stockwatering Use Supplemental Sheet* which you may use to assist you in providing this information.

I am returning the referenced application so that you may provide the requested information. In order that the application will retain its priority of filing, the original application and attachments must be returned, along with the requested additional information, to this office on or before **February 27, 2017**, or within any authorized extension of time thereof. According to the law, default in the refileing of the completed application and attachments as outlined above, within the time allowed, shall constitute forfeiture of the priority date and dismissal of the application.

If you have any questions, please contact me at (785) 564-6643 or Brent Turney, Change Application Unit Supervisor at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

RE: Water Right, File No(s). 19521-D1

Dear Mr. Oldham,

You will find enclosed with this letter an application to change the place of use and use made of water for the referenced file number. The application was written with the intent converting File No. 19521-D1 to a dual use permit for both irrigation and stockwatering use at the Wilroads Feedyard located largely in the in the West Half of 9-27-24W, Ford County.

The enclosed application and map should be carefully reviewed. Feel free to make corrections or clarifications as needed. Please note that the consumptive use numbers described on item numbers 8, 14, 13 and 17 were calculated using the Division of Water Resources' regulations. If you have any additional information that would allow for a higher conversion rate, please feel free to correct the application. Any supporting documentation for any modifications to this number should be submitted along with the application.

In addition, the map will need to be reviewed in order to ensure all known domestic wells are shown. If you have to add any wells, please provide the landowner's name and mailing address. Beyond what has been noted here, the application is complete except for a notarized signature from Loren & Veleeta Doll, the landowners of record. The map will also need to be signed.

The total fee for filing the enclosed application is \$500. Please include a check made payable to the Kansas Department of Agriculture for the total amount with the signed application when you submit it to Manhattan for processing. If I can be of any further assistance, or if you have any questions regarding the enclosed application, please give me a call at 620.234.5311.

Sincerely,

Elizabeth K. Fitch

FILE COPY

RE: File No. 19521-D1

Dear Sir or Madam:

An application for approval of the Chief Engineer to change the following condition or conditions of the file number referred to above has been received:

- place of use PU/UMW
- point of diversion
- use made of water

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. Therefore, to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. You will be contacted regarding this application as soon as it has been examined.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water prior to approval of the application is unlawful. You should not proceed and divert water as indicated by your plans in your application for a change for this file until you receive approval for this change from the Chief Engineer. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.

(b) (1) The violation of any provision of this section by any person is a class C misdemeanor...

A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

A handwritten signature in cursive script that reads "Brent A. Turney".
