FROM: Richelle A. Krueger

RE: Vested Right
File No. KM 004
Water Right
File No. 15,907

Aaron Murphy, Mayor, on behalf of the City of Cunningham, Kansas, filed applications for approval to change the authorized points of diversion for File Nos. KM 004 and 15,907, both located in the South Fork Ninescah River basin.

The referenced water rights do not appear abandoned.

The referenced file numbers are authorized a limited total of 47.747 million gallons per calendar year and a total of 545 gallons per minute from the same two wells for municipal use in the City of Cunningham, Kansas and vicinity. The wells are authorized blanket quantities and assigned diversion rates per well. A letter dated May 4, 2017 from Ned Marks of Terrane Resources Co. indicates the authorized wells have been in existence for over 80 years and are impacted by nitrates. The City proposes to drill a new well and create a battery of three wells with the other two wells. The proposed geographic center of the battery will be located 784 feet North and 2,475 feet West of the Southeast corner of Section 32, Township 27 South, Range 10 West, Kingman County, Kansas, distance moves of less than 300 feet

Although the proposed battery of wells will meet the definition of a battery of wells as defined in K.A.R. 5-1-1, it appears that a waiver of K.A.R. 5-2-3 *Battery of Wells* will be required. Based on WIMAS, the proposed geocenter is in an area where a new application filed to appropriate water at the geocenter of the proposed battery of wells would not meet safe yield, allowable appropriation, or similar type of regulation for a well filed at that location. A waiver appears reasonable. Paragraph No. 18 of the application indicates that the City needs the additional flexibility of a battery and the addition of a third well for redundancy and public health and safety if one of the wells should go down. The two original wells are over 80 years old and it appears to be in the public interest to grant a waiver.

No non-domestic wells were indicated in WRIS within one-half mile of the proposed geocenter and no domestic wells within 1,000 feet of the proposed geocenter were shown on the map. A public notice was printed in the local paper once a week for three consecutive weeks to notify interested parties of this application. A period of fifteen (15) days was allowed for comments after the final publication of this notice. No responses have been received as of today's date

The same local source of supply will not change, which Paragraph No. 17 of the application indicates is (180) undifferentiated Kansan/Nebraskan.

In an e-mail dated September 28, 2017, Jeff Lanterman, Water Commissioner of the Stockton Field Office, indicated that he has no objection to the approval of the referenced applications.

A water flow meter, water level measurement tube and check valve will be required.

Based on the above discussion, that the change is reasonable, that impairment to existing water rights is unlikely, that no change in the local source of supply will occur, and if the Chief Engineer grants a waiver of K.A.R. 5-2-3, it is recommended the referenced applications be approved.

FILE COPY

RE: Vested Right, File No. KM 004
Water Right, File No. 15,907

Dear Mayor Murphy:

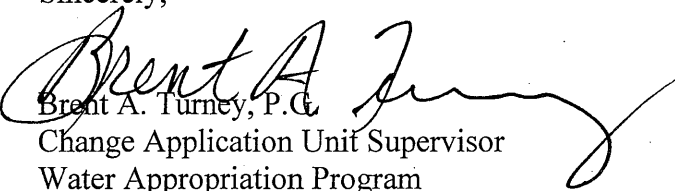

Enclosed are the orders executed by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the applications for change under the above referenced file numbers.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in these approvals for change. A condition of these approvals is that acceptable water flow meters must be installed on the diversion works authorized under the referenced file numbers. Please return the required notification of completion of the diversion works and/or installation of the required meters as soon as these actions are completed.

Since the orders for the referenced file numbers modify the original documents referred to above they should be recorded with the Register of Deeds as other instruments affecting real estate.

If you have any questions, please contact this office. If you call, please reference the file number so we can help you more efficiently.

Sincerely,

Brent A. Turney, P.G.

DIVISION OF WATER RESOURCES
David W. Barfield, Chief Engineer

**APPROVAL OF APPLICATION
FOR
CHANGE IN
POINT OF DIVERSION
VESTED RIGHT
FILE NO. KM 004**

The Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, after due consideration of the written application of Aaron Murphy, Mayor, on behalf of the City of Cunningham, Kansas, P.O. Box 188, Cunningham, Kansas, 67035, received in this office on May 12, 2017, for approval of a change in the location of the point of diversion under the vested right order, determining and establishing a vested right to continue the beneficial use of water, then identified in the office of the Chief Engineer as Vested Right, Code 624, Kingman County, now identified as Vested Right, File No. KM 004, as modified and amended by the Findings and Order of the Chief Engineer dated July 17, 1981, establishing the ten acre tract upon which the points of diversion are located, finds that the change is reasonable and will not impair existing rights, that the change relates to the same local source of supply and that the application should be and is hereby approved.

The effective date of the change shall be the date this order is executed by the Chief Engineer, after which the authorized location of the point of diversion shall be:

one(1) battery of three(3) wells with a geographic center located in Lot 8, Block 20, Original Town of Cunningham, in the Northwest Quarter of the Southwest Quarter of the Southeast Quarter (NW $\frac{1}{4}$ SW $\frac{1}{4}$ SE $\frac{1}{4}$) of Section 32, more particularly described as being near a point 784 feet North and 2,475 feet West of the Southeast corner of said section, in Township 27 South, Range 10 West, Kingman County, Kansas, at a diversion rate not in excess of 240 gallons per minute (0.53 c.f.s.) and in a quantity not to exceed 18 million gallons of water per calendar year,

located substantially as shown on the map accompanying the application to change the point of diversion.

The point of diversion described herein as a battery of three (3) wells is further limited such that the wells shall be located within a three hundred (300) foot radius circle, in the same local source of supply.

Installation of the works for diversion of water shall be completed on or before December 31, 2018, or within any authorized extension of time. The water right owner shall notify the Chief Engineer of the Division of Water Resources, Kansas Department of Agriculture, when construction of the works for diversion has been completed.

All wells with a diversion rate of 100 gallons per minute or more drilled under the authority of this order shall have a tube or other device installed in a manner acceptable to, and in accordance with specifications adopted by, the Chief Engineer. This tube or device shall be suitable for making water level measurements and shall be maintained in a condition satisfactory to the Chief Engineer.

All diversion works into which any type of chemical or other foreign substance will be injected into the water pumped from the diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer.

The water right owner shall submit to the Chief Engineer a copy of the well log required by the Kansas Department of Health and Environment under the authority of K.S.A. 82a-1212, currently form WWC-5, within 30 days following the drilling of the well at the location authorized herein.

The water right owner shall properly install an acceptable water meter on the diversion works authorized under this water right, prior to the use of water, in strict accordance with the Kansas Administrative Regulations 5-1-4 through 5-1-12 adopted by the Chief Engineer. The water right owner shall notify the Chief Engineer when installation of the water meter has been completed. The water right owner shall maintain the water meter in an operating condition satisfactory to the Chief Engineer, at all times during diversion of water and shall maintain records from which the total quantity of water diverted may be determined. The water right owner shall also report the reading of said water meter and the total quantity of water diverted annually to the Chief Engineer. Such records shall be furnished to the Chief Engineer by March 1 following the end of each calendar year.

In all other respects, the vested right order, determining and establishing a vested right to continue the beneficial use of water, identified in the office of the Chief Engineer as Vested Right, File No. KM 004, is as stated and set forth in the vested right order executed by the Chief Engineer on October 6, 1954, as modified and amended by the aforementioned order.

RIGHT TO A HEARING AND TO ADMINISTRATIVE REVIEW

If you are aggrieved by this Order, then pursuant to K.S.A. 82a-1901, you may:

- 1) request an evidentiary hearing before the Chief Engineer, or
- 2) request administrative review by the Secretary of Agriculture.

Failure to request an evidentiary hearing before the Chief Engineer does not preclude your right to administrative review by the Secretary.

To obtain an evidentiary hearing before the Chief Engineer, a written request for hearing must be filed within 15 days after service of this Order as provided in K.S.A. 77-531 (**i.e., within a total of 18 days after this Order was mailed to you**), with: Kansas Department of Agriculture, Attn: Legal Section, 1320 Research Park Drive, Manhattan, KS 66502, FAX (785) 564-6777.

If you do not file a request for an evidentiary hearing before the Chief Engineer, you may petition for administrative review of the Order by the Secretary of Agriculture. A petition for review shall be in writing and state the basis for requesting administrative review. The request for hearing may be denied if the request fails to clearly establish factual or legal issues for review. See K.S.A. 77-527. The petition must be filed within 30 days after service of this Order as provided in K.S.A. 77-531 (**i.e., within a total of 33 days after this Order was mailed to you**), and be filed with: Secretary of Agriculture, Attn: Legal Division, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, KS 66502, FAX (785) 564-6777.

If neither a request for an evidentiary hearing nor a petition for administrative review is filed as set forth above, then this Order shall be effective and become a final agency action as defined in K.S.A. 77-607(b). Failure to timely request either an evidentiary hearing or administrative review may preclude further judicial review under the Kansas Judicial Review Act.

Any request for hearing or petition for administrative review shall be in writing and shall be submitted to the attention of: Chief Legal Counsel, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502, Fax: (785) 564 - 6777.

Ordered this 12th day of October, 2017, in Topeka, Shawnee County, Kansas.

**WAIVER OF REGULATION
K.A.R. 5-2-3
Battery of Wells**

Date: 10/12/17

Re: Vested Right, File No. KM 004 and Water Right, File No. 15,907

1. That K.A.R. 5-2-3 *Battery of wells* states in part that if the time to construct the diversion works has expired, an application for change to add one or more wells to the authorized well to create a battery of wells shall not be approved unless a new application to appropriate water filed at the geocenter of the proposed battery of wells would meet the safe yield, allowable appropriation, or similar type of regulation, for a well filed at that location, and that the proposed battery of wells must meet the definition of a battery of wells in K.A.R. 5-1-1. That the time to construct the diversion works for Vested Right, File No. KM 004 and Water Right, File No. 15,907 has expired.
2. That the referenced file numbers are both authorized the same two wells and the same municipal place of use. The wells are authorized blanket quantities and assigned diversion rates per well. The City proposes to drill a new well and create a battery of three wells with the other two wells. The proposed geographic center of the battery will be located 784 feet North and 2,475 feet West of the Southeast corner of Section 32, Township 27 South, Range 10 West, Kingman County, Kansas, distance moves of less than 300 feet.
3. Although the proposed battery of wells will meet the definition of a battery of wells as defined in K.A.R. 5-1-1, it appears that a waiver of K.A.R. 5-2-3 *Battery of Wells* will be required. Based on WIMAS, the proposed geocenter is in an area where a new application filed to appropriate water at the geocenter of the proposed battery of wells would not meet safe yield, allowable appropriation, or similar type of regulation for a well filed at that location.
4. A waiver of K.A.R. 5-2-3 appears reasonable. Paragraph No. 18 of the application indicates that the City needs the additional flexibility of a battery and the addition of a third well for redundancy and public health and safety if one of the wells should go down. The two original wells are over 80 years old and it appears to be in the public interest to grant a waiver.
5. That the referenced applications for File Nos. KM 004 and 15,907 should be approved with a waiver of K.A.R. 5-2-3.
6. That the waiver of K.A.R. 5-2-3 will neither prejudicially nor unreasonably affect the public interest and it will not impair an existing water right.

MAY 19 2017

12. The presently authorized use of water is for Municipal purposes.
It is proposed that the use be changed to No Change purposes.
13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased.
No proposed change to the place of use or use made of water.
-
- (Please show any calculations here.)
14. It is requested that the maximum annual quantity of water be reduced to --- (acre-feet or million gallons).
15. It is requested that the maximum rate of diversion of water be reduced to --- gallons per minute (--- c.f.s.).
16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.
- a. If a change in the location of the point(s) of diversion is proposed, show:
 - 1) The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.
 - 2) If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within ½ mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within ½ mile, please indicate so on the map.
 - 3) If the source of supply is surface water, the names and mailing addresses of all landowner(s) ½ mile downstream and ½ mile upstream from your property lines must be shown.
 - b. If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.
17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.
- All wells will be placed in the same local source of supply which is undifferentiated Kansan Nebraskan age materials. Test hole logs are attached. Since the rate and quantity are not being increased and the current system has been in place for decades impairment will not occur.
18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.
- Request a waiver of K.A.R 5-2-3 Battery of Wells. Current wells meet the definition of a battery and have always been operated as such. Need the additional flexibility of a battery of wells and the addition of a third well for redundancy and public health and safety if one well should go down. In asking for a third well to the battery, rate and quantity shall not be increased. Additionally, third well will be needed to assist with mixing due to increasing nitrates in the upper aquifer that the current wells are placed in. Well will be completed in the same local source of supply and aquifer. Current wells are approximately 80 years old.

KS DEPT OF AGRICULTURE
SCANNED

Any use of water that is not as authorized by the water right or permit to authorize water **before** the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than \$100 nor more than \$1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

Dated at Cunningham, Kansas, this 8th day of May, 2017.

Re: Files KM 04 and #15,907

Dear Mr. Turney,

This letter is written on behalf of the City of Cunningham, KS to provide information pertaining to the processing of the proposed changes to the above files. The data attached is provided to help in the determination to allow the change to battery permits and the installation of a third well.

We met with Jeff Lanterman and Tyler Saryerwinnie at the DWR Stafford Field Office. This meeting resulted in the enclosed change applications.

The proposed changes are requested for public health and safety reasons and to add redundancy to the system. The City is currently operating on two wells which were installed in late 1935 and early 1936. Both wells have been impacted by nitrates and the east well has exceeded the drinking water standard of 10 mg/l nitrate as nitrogen(NO₃-N). Fortunately, they were able to blend with the west well and remain in compliance with regards to water quality. The proposed additional well will allow them to blend if the west well fails or has to be taken out of service.

The City has taken great care to manage the fertilizer they apply to the football field and have subsequently reduce the nitrate contamination to the wells. It is expected they will continue to manage the nutrients and monitor the water quality. The approval of the proposed changes will allow the city to manage their wellfield to minimize future water quality issues and be able to handle potential well/pump failures.

The current wells are of sufficient age and need to be evaluated and possibly updated. However due to the current demands on the system it is not feasible to take one of the wells out of service for an extended period of time. With the

SCANNED

additional well the City will have two low nitrate wells they can depend on to blend with the high nitrate well should it exceed the drinking water standard in the future. At this time we do not plan to replace the existing wells. However, the City does plan to upgrade them as needed to hopefully get another 80 years of service out of them.

Attached you will find two WWC-5's, the first is for MW 1-12 which is near the East well and the other is for TW 5-16 which is approximately 15 feet east of the proposed new well site. The existing City wells are approximately 60 feet deep and withdraw from the very upper portion of the aquifer. The proposed new well will withdraw low nitrate water from the bottom of the same aquifer unit.

Based on the data we have obtained and collected the water levels in the area are essentially unchanged. The water level in the East well was 26.6 feet below land surface(bls) Dec., 1935. Water levels from MW 1-12, which is approximately, 30 feet SSW of the East Well, were 21.62' (11/26/12), 21.22' (04/06/16) and 21.16' (08/29/16) all below land surface.

The City is aware they will not receive any additional rate or quantity over what they are already approved for.

The geographic center of the the well field will shift to the south and east. This will move the geo-center away from any nearby domestic wells. Since we are moving away from any nearby wells and with the multitude of landowners involved the City is requesting guidance as to how DWR would like for them to proceed with landowner notifications. Additionally, The City will look at nearby landowners and try to identify any domestic wells within 660 feet of the proposed geo-center.

Brent, as always should you, or any of your staff have any questions, do not hesitate to contact us. We would also ask that we be copied on any correspondence regarding these matters.

Respectfully Submitted,

To: Krueger, Richelle
Cc: Conant, Cameron; Saryerwinnie, Tyler
Subject: RE: Request for Recommendation Chang in PD File No. KM004 and15907 City of Kingman

Richelle;

I am aware of these changes and worked through the issues on the potential waiver request with Ned here at the office. Tyler filled the applications out for him.

We worked out well locations and everything with Ned here in the office.

I agree with these change applications and believe they should be approved with the appropriate waivers. This will fix a brewing issue with aging wells and no backups for a municipality. Potential disaster.

If you have any questions give me a call.

Thanks.

Jeff

Hi Jeff,

Attached is a draft memo for the City of Kingman changes in pd, the comment period expires September 27th, but thought I would go ahead and get the memo drafted. No comments so far...

Do you recommend approval of the referenced pd changes if we do not receive any comments before the 27th?

Thanks,
Richelle

RE: Vested Right, File No. KM 004 and Water Right, File No. 15,907

KS DEPT OF AGRICULTURE

Dear Ms. Krueger,

In response to your letter dated July 25, 2017, I have enclosed 1) a signed copy of the map showing domestic well locations within 1,000 feet of the geographic center of the proposed well battery. After checking the properties within the circle marked on the map, we find that there are no domestic wells within that area.

Also enclosed is a proof of publication for the public notice published for three consecutive weeks in The Cunningham Courier.

Sincerely,

David Steffen, City Clerk

Public Notice

(Published in The Cunningham Courier, Thursday, August 3, 2017) 3t

The City of Cunningham, Kansas, has filed with the Division of Water Resources, Kansas Department of Agriculture, two (2) applications to change the point of diversion pursuant to Vested Right, File No. KM 004 and Water Right, File No. 15,907. The City proposes to create a battery of three (3) wells from two existing wells and a third well. The applicant proposes to change the points of diversion for File Nos. KM 004 and 15,907 **from:** two(2) wells - one (1) well located near the North side of Lot 8, Block 20, Original Town of Cunningham (identified by the City as Well No. 2-West Well), in the Northwest Quarter of the Southwest Quarter of the Southeast Quarter (NW¼ SW¼ SE¼) of Section 32, more particularly described as being near a point 842 feet North and 2,607 feet West of the Southeast corner of said section; and one (1) well located near the North side of Lot 8, Block 20, Original Town of Cunningham (identified by the City as Well No. 1-East Well), in the Northwest Quarter of the Southwest Quarter of the Southeast Quarter (NW¼ SW¼ SE¼) of Section 32, more particularly described as being near a point 838 feet North and 2,497 feet West of the Southeast corner of said section, both in Township 27 South, Range 10 West, Kingman County, Kansas **to:** one(1) battery of three(3) wells with a geographic center located in Lot 8, Block 20, Original Town of Cunningham, in the Northwest Quarter of the Southwest Quarter of the Southeast Quarter (NW¼ SW¼ SE¼) of Section 32, more particularly described as being near a point 784 feet North and 2,475 feet West of the Southeast corner of said section, in Township 27 South, Range 10 West, Kingman County, Kansas.

Any interested party is invited to submit to this office on or before September 22, 2017 written comments as to whether Applications to Change the Point of Diversion for File Nos. KM 004 and 15,907 should be approved or not approved. Persons submitting comments should specifically indicate their interest in the applications in a clear and concise manner:

The change applications for File Nos. KM 004 and 15,907 are on file and available for public inspection in the office of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502.

ATTN MAYOR AARON MURPHY
PO BOX 188
CUNNINGHAM KS 67035

RE: Vested Right, File No. KM 004 and Water Right, File No. 15,907

Dear Mayor Murphy,

Reference is made to the applications for approval of the Chief Engineer to change the point of diversion under the referenced file numbers which were received in the office of the Chief Engineer on May 12, 2017. Upon review of the applications, it was determined that additional information will be required to further process the applications.

We will need the locations of any domestic wells within 1,000 feet of the geographic center of the proposed well battery to be plotted on the enclosed map. We will also need the domestic well owner's names and mailing addresses provided so that we may notify them. Please sign and date the map where indicated. If there are no domestic wells within 1,000 feet of the proposed well, please indicate that on the map. Please return the completed map with the plotted domestic well locations and mailing addresses to my attention at the address listed at the top of this page.

Also enclosed is a copy of the notification of your applications to change the point of diversion under the above referenced file numbers. This notice should be published in a local paper of record once a week for three (3) consecutive weeks at your expense. Copies of the published notification are to be submitted to this office within two (2) weeks of final publication. If the date given in paragraph 2 of the notice does not allow 15 days for public comments following the final publication, this office should be contacted for permission to revise the date to allow adequate time for comments.

Please return the above requested information as soon as possible so that I may continue with processing your applications. If you have any questions, feel free to contact me at (785) 564-6635 or Change Application Unit Supervisor, Brent Turney, at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Subject: RE: Changes in PD File Nos: KM4 and 15907 City of Cunningham

Hi Cameron, thanks for the info, I will just go with everything as it is on the application. I am never sure on those feet distances which ones we are supposed to use and well battery feet distances get confusing for me in a hurry!
Thanks again, have a great weekend!

Richelle, I was not involved with this but I spoke with Tyler about them. Brent and Jeff worked together on this, so we assume this is good to go.

The last bullet, the authorized footages came from a 2001 FIR for File No. 15907, so those footages are GPS'd and Leobased already. The authorized values used in the change, are the original GPS'd and modified footages from the FIR. This is correct. If you need more detail, call Tyler about the NAD 83 question. It can't be explained in an email, but it sounds like we used an appropriate method to determine footages for the proposed well and geo-center.

I'd say you chat with Brent when he is back and you probably can get it all hashed out with him.

Subject: Changes in PD File Nos. KM4 and 15907 City of Cunningham

Hi Jeff and Cameron,

I have begun reviewing the City of Cunningham files and had some questions, I haven't reviewed this with Brent yet but thought I would get started and get your thoughts on these applications when you get a chance...

- Did you all run a safe yield for this or is it possible that a new app could be approved at this location, I noticed it was in South Central Kansas Designated Unit Area SNI 25?
- If needed, do you think a waiver of K.A.R. 5-2-3 Battery of Wells is justified and do we need to also apply K.A.R. 5-5-16 Additional Wells?
- Do you think we should make them do a public notice and make them locate all domestics within 660 or 1000 feet or give them the option to identify all domestic wells within one-half mile?

-
- I am not sure, but it looks like the proposed geocenter was calculated with approved feet distances of the existing two wells and NAD 83 feet distances for the new well, please see attached. Would you rather we use gps feet distances of the existing wells and the NAD 27 feet distances or leave everything as is?

I would sure appreciate your thoughts on this and any info you have!

Thanks,
Richelle

RE: File No. KM 4

Dear Sir or Madam:

An application for approval of the Chief Engineer to change the following condition or conditions of the file number referred to above has been received:

- place of use PD
- point of diversion
- use made of water

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. Therefore, to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. You will be contacted regarding this application as soon as it has been examined.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water prior to approval of the application is unlawful. You should not proceed and divert water as indicated by your plans in your application for a change for this file until you receive approval for this change from the Chief Engineer. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.

(b) (1) The violation of any provision of this section by any person is a class C misdemeanor...

A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

A handwritten signature in cursive script that reads "Kristen A. Baum".
