MEMORANDUM

TO: Files

DATE: August 18, 2021

FROM: Leslie Ireland

RE: Vested Right, File No. SU 002
Water Right, File No. 2,724

On December 12, 2016, Kent Hixon, City Administrator for the City of Mulvane, filed applications to change the points of diversion authorized for municipal use. The applicant was assisted by Daniel Clement, Hydrologist, Burns & McDonnell.

The applications for change were to consolidate the wells under the referenced files as the City has grown resulting in additional water needs. It appears the requested changes would move the points of diversion further than what is considered the local source of supply thus not complying the K.S.A. 82a-708b, *Application for change in place of use point of diversion and use made of; fee: review of action on application*. It was determined the City should file a new permit for the growth and proposed well location. The City filed applications in July and August of 2017 which were assigned File Nos. 49,877 & 49,883. The proposed quantity under the permits will be offset by the senior existing rights, File Nos. SU 002, 2724 & 31,869.

Based on the above discussion, it is recommended that the applications to change the points of diversion filed on December 12, 2016, for the referenced files, be dismissed.

Water Right, File No. 2,724

Dear Sir or Madam:

Enclosed are the Findings and Orders by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, regarding the Applications for Change under the referenced files.

Your request for the voluntary withdraw of the December 12, 2016, applications for change in point of diversion under the referenced files, was received in the office of the Chief Engineer on August 20, 2018, and has been processed in accordance with your request. The December 12, 2016, *Application to Change the Point of Diversion* for each of the referenced files has been dismissed and any priority held by the applications for change has been forfeited.

It appears circumstance number 11 of this regulation which states the rights are located within an area of the state that is closed to by regulation or order of the Chief Engineer, would match your reason for due and sufficient cause for nonuse under the referenced files. Please be reminded that said information should be **furnished to the Chief Engineer by March 1** following the end of the previous calendar year.

If you have any questions, please contact me at 785-564-6640. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.
