File No. <u>JAN 1 0 2025</u>

	5.	The	location of the proposed wells, pump sites or other works for diversion of water is:							
		Note	e: For the application to be accepted, the point of diversion location must be described to at least a 10 acre tract, unless you specifically request a 60 day period of time in which to locate the site within a specifically described, minimal legal quarter section of land.							
		(A)	One in the quarter of the quarter of the NC-SW quarter of Section 15 , more particularly							
DIV:	6956	1	described as being near a point 1321 feet North and 3969 feet West of the Southeast corner of said							
DIV.	0000		section, in Township 22 South, Range 3W East/West (circle one), Harvey County, Kansas.							
		(B)	One in the quarter of the quarter of the quarter of Section, more particularly							
			described as being near a point feet North and feet West of the Southeast corner of said							
			section, in Township South, Range East/West (circle one), County, Kansas.							
		(C)	One in the quarter of the quarter of the quarter of Section, more particularly							
			described as being near a point feet North and feet West of the Southeast corner of said							
			section, in Township South, Range East/West (circle one), County, Kansas.							
		(D)	One in the quarter of the quarter of the quarter of Section, more particularly							
			described as being near a point feet North and feet West of the Southeast corner of said							
			section, in Township South, Range East/West (circle one), County, Kansas.							
		If the source of supply is groundwater, a separate application shall be filed for each proposed well or battery of wells, except that a single application may include up to four wells within a circle with a quarter (¼) mile radius in the same local source of supply which do not exceed a maximum diversion rate of 20 gallons per minute per well.								
		than pum	attery of wells is defined as two or more wells connected to a common pump by a manifold; or not more four wells in the same local source of supply within a 300 foot radius circle which are being operated by ps not to exceed a total maximum diversion rate of 800 gallons per minute and which supply water to a mon distribution system.							
	6.		owner of the point of diversion, if other than the applicant is (please print): sell A. & Melaney A. Dick Trusts, 10415 N. Buhler Rd., Inman, KS 67546, (620) 727-0650							
		Dort	(name, address and telephone number) hy A. Dick Trust, 12703 E. 82nd Ave., Buhler, KS 67522							
		Dort	(name, address and telephone number)							
		land	must provide evidence of legal access to, or control of, the point of diversion from the landowner or the owner's authorized representative. Provide a copy of a recorded deed, lease, easement or other ument with this application. In lieu thereof, you may sign the following sworn statement:							
			I have legal access to, or control of, the point of diversion described in this application from the landowner or the landowner's authorized representative. I declare under penalty of perjury that the foregoing is true and correct.							
			Executed on January 3, 2025. Applicant's Signature							
		land	applicant must provide the required information or signature irrespective of whether they are the owner. Failure to complete this portion of the application will cause it to be unacceptable for filing and the ication will be returned to the applicant.							
	7.	The	proposed project for diversion of water will consist of one existing well							
			(number of wells, pumps of dams, etc.) (was)(will be) completed (by) Completed on 9/28/2004 under No. 45700							
	8.	The (Mo/E	(Month/Day/Year - each was or will be completed) first actual application of water for the proposed beneficial use was or is estimated to be as soon as possible and pay/Year)							

 9. Will pesticide, fertilizer, or other foreign substance be injected into the water pumped from the diversity experiments and reporting result of the proposed point (s). All chemigation safety requirements must be met including a chemigation permit and reporting resulting to the proposed water, please contact the Division of Water Resources for assists submitting the application. Please attach a reservoir area capacity table and inform us of the tosurface drainage area above the reservoir. Have you also made an application for a permit for construction of this dam and reservoir with the Water Resources? ☐ Yes ☐ No If yes, show the Water Structures permit number here NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit number here NA If no, explain here why a Water Structures permit is not required NA If no, explain here why a Water Structures permit number here NA If no, explain here why a Water Structures permit number here NA If no, explain here why a Water Stru	ne diversion works?
All chemigation safety requirements must be met including a chemigation permit and reporting re 10. If you are planning to impound water, please contact the Division of Water Resources for assista submitting the application. Please attach a reservoir area capacity table and inform us of the treservoir. Have you also made an application for a permit for construction of this dam and reservoir with the Water Resources? Yes No If yes, show the Water Structures permit number here NA If no, explain here why a Water Structures permit is not required NA 11. The application must be supplemented by a U.S.G.S. topographic map, aerial photograph, or plat, identify the section, the section lines or the section corners and show the appropriate section, townshin numbers. Also, please show the following information: (a) The location of the proposed point(s) of diversion (wells, stream-bank installations, dan diversion works) should be plotted as described in Paragraph No. 5 of the application, showin South distance and the East-West distance from a section line or southeast comer of section (b) If the application is for groundwater, please show the location of any existing water wells of an ½ mile of the proposed well or wells. Identify each existing well as to its use and furnish the mailing address of the property owner or owners. If there are no wells within ½ mile, please is of the proposed well or wells. Identify each existing well as to its use and furnish the mailing address of the proposed place of use should be shown by crosshatching on the topog aerial photograph or plat. (c) If the application is for surface water, the names and addresses of the landowner(s) ½ mile and ½ mile upstream from your property lines must be shown. (d) The location of the proposed place of use should be shown by crosshatching on the topog aerial photograph or plat. (e) Show the location of the pipelines, canals, reservoirs or other facilities for conveying water for diversion to the place of use. A 7.5 minute U.S.G.S. topograp	ic diversion works:
 10. If you are planning to impound water, please contact the Division of Water Resources for assista submitting the application. FEE SCHEDULE

1. The fee for an application for a permit to appropriate water for beneficial use, except for domestic use, shall be (see paragraph No. 2 below if requesting storage):

ACRE-FEET	FEE
0-100	\$200.00
101-320	\$300.00
More than 320	\$300.00 plus \$20.00 for each additional 100 acre-feet or any part thereof.

2. The fee for an application in which storage is requested, except for domestic use, shall be:

ACRE-FEET	FEE
0-250	\$200.00
More than 250	\$200.00 plus \$20.00 for each additional 250 acre-feet of storage or any part thereof.

Note: If an application requests both direct use *and* storage, the fee charged shall be as determined under No. 1 or No. 2 above, whichever is greater, but not both fees.

3. The fee for an application for a permit to appropriate water for water power or dewatering purposes shall be \$100.00 plus \$200.00 for each 100 cubic feet per second, or part thereof, of the diversion rate requested.

Note: The applicant shall notify the Chief Engineer and pay the statutorily required field inspection fee of \$400.00 when construction of the works for diversion has been completed, except that for applications filed on or after July 1, 2009, for works constructed for sediment control use and for evaporation from a groundwater pit for industrial use shall be accompanied by a field inspection fee of \$200.00.

MAKE CHECKS PAYABLE TO THE KANSAS DEPARTMENT OF AGRICULTURE

ATTENTION

A Water Conservation Plan may be required per K.S.A. 82a-733. A statement that your application for permit to appropriate water may be subject to the minimum desirable streamflow requirements per K.S.A. 82a-703a, b, and c may also be required from you. After the Division of Water Resources has had the opportunity to review your application, you will be notified whether or not you will need to submit a Water Conservation Plan. You also may be required to install a water flow meter or water stage measuring device on your diversion works prior to diverting water. There may be other special conditions or Groundwater Management District regulations that you will need to comply with if this application is approved.

CONVERSION FACTORS

1 acre-foot equals 325,851 gallons

1 million gallons equal 3.07 acre-feet

RE: Application, File No(s). 51395

Dear Sir or Madam:

The Division of Water Resources (Division) has received your application(s) for a permit to appropriate water for beneficial use. Your application(s) has been assigned the file number(s) referenced above. Please be aware that the Division may have a large number of pending applications on hand at times and makes every attempt to process them in the order in which they are received. You will be contacted if additional information is required.

Please note, this letter only acknowledges receipt of your application(s) and does not guarantee approval. In accordance with the provisions of the Kansas Water Appropriation Act, the use of water as proposed prior to approval of the application(s) is unlawful.

Additional information about the process may be found on our website at <u>agriculture.ks.gov/divisions-programs/dwr</u>. If you have any other questions, please contact our office at 785-564-6640 or your local Stafford Field Office at 620-234-5311. If you call, please reference the file number so we can help you more efficiently.

Sincerely,

Kris Neuhauser New Applications Lead Water Appropriation Program
