Minimum Desirable Streamflow

Dear Sir:

I understand that a Minimum Desirable Streamflow requirement has been established by the legislature for the source of supply to which the above referenced application applies.

I understand that diversion of water pursuant to this application will be subject to regulation any time Minimum Desirable Streamflow requirements are not being met.

I also understand that if this application is approved, there could be times, as determined by the Division of Water Resources, when I would not be allowed to divert water. I realize that this could affect the economics of my decision to appropriate water.

I am aware of the above factors, and with the knowledge thereof, request that the Division of Water Resources proceed with processing and approval, if possible, of the above referenced application.

RE: Low Hazard Dam Registration  
WSN: DWS-0129

Dear Mr. Bott:

Please accept this letter as confirmation that your proposed dam is exempt from the dam safety permit requirements specified in K.S.A. 82a-301(a), and the submitted dam location has been registered in our records.

You reported that your dam will be located in the SE 1/4 of the NE 1/4 of the NE 1/4 of Section 26, Township 5 South, Range 3 East in Washington County. You also reported that the proposed dam has a height of 22 feet, and a storage volume of 121.2 acre-feet at the emergency spillway elevation. We verified that your proposed dam qualifies for the hazard class A permit exemption specified in K.S.A. 82a-301(d)(1).

Please note that your dam may be reclassified to a hazard class B or C in the future as a result of improvements or changes on downstream properties. If that occurs, you will be required to obtain a dam safety permit for the existing dam. This may require redesign and partial reconstruction of the dam to meet applicable dam safety standards.

Please contact me at 785-564-6652 if you have any questions.

Sincerely,

Kimberly A. Hunninghake, P.E.

**REGISTRATION FORM FOR EXEMPT CLASS A DAMS**

**K.S.A. 82a-301**

"Dam" means any artificial barrier including appurtenant works with the ability to impound water, waste water or other liquids that has a height of 25 feet or more; or has a height of six feet or greater and a storage volume at the top of the emergency spillway elevation of 50 or more acre-feet. The prior written consent or permit of the chief engineer shall not be required for construction or modification of a hazard class A dam that:

1. has a height of less than 30 feet and a storage volume at the top of the emergency spillway elevation of less than 125 acre feet, **and the dam location and dimensions have been registered with the division of water resources in a written form prescribed by the chief engineer; or**
2. is a wastewater storage structure for a confined feeding facility that has been approved by the secretary of health and environment pursuant to K.S.A. 65-171d, and amendments thereto.

Complete the following information to satisfy the registration for exempt low, hazard class A dams defined in K.S.A. 82a-301(d)(1).

**Area capacity table:** Please attach a reservoir area capacity table for the dam. The table identifies the number of acres enclosed by each contour within the reservoir area and the total storage capacity of the reservoir in acre-feet at the elevation of each contour. The data shall be compiled for all contours in the reservoir up to the elevation of the top of the dam. Computations of capacity shall be based on the natural topography of the reservoir basin but may include the volume of any excavation in the reservoir made during construction of the dam. **The storage in acre-feet must be shown in the table for the proposed emergency spillway elevation. This will be used to identify the jurisdiction of the dam.**

**Location map:** Submit a U.S.G.S. topographic map, aerial photograph or a detailed plat showing the location and layout of the proposed dam, the location of the stream, and the property lines. The distance from the North-South distance and the East-West distance from a section line or southeast corner of section should be marked on the map along with a north arrow and map scale.

**Hazard class determination:** List any homes, businesses, highways, improved roads, railroads, camp grounds, recreational facilities, or public utilities located downstream from the dam that could be inundated if the dam fails.

Your application for permit to appropriate water in 26-5S-3E in Washington County, was received and has been assigned the file number noted above.

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. **(b) (1) The violation of any provision of this section by any person is a class C misdemeanor . . .**

**A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.**
