PERMIT RESTRICTIONS

1. Well permits are required prior to construction or a late fee of \$250.00 will be assessed.
2. Permits are not required for test holes, temporary dewatering wells (less than 90 days), or wells designed to pump 50 gallons per minute or less.
3. If the well is not constructed within a one year period from the date of approval, a new permit is needed.
4. The well authorized by this permit may not be constructed closer than 600 feet from an existing well having a capacity of 51 gallons per minute or more, unless both the new and existing wells are owned by the same individual.
5. According to State law 46-637, water wells may not be drilled within 50 feet of a stream bank without first getting a surface water right for the stream from the Department of Natural Resources.
6. Replacement wells do need a permit from the Lower Republican NRD. A replacement well is one which replaces an abandoned water well that has been operated within the last three years and is constructed to water the same acres of land as the abandoned water well. If the well is being replaced, it must be properly abandoned according to state guidelines. A copy of these guidelines is available from the Lower Republican Natural Resources District.
7. All new or replacement water wells constructed in the District are required to be sampled for nitrates upon completion.
 - A. Municipalities which develop a new public water well shall submit a copy of the well's initial water quality test results to the District within 30 days of receipt of such results from the Department of Health.
 - B. The sample for all non-municipal wells shall be collected by the owner, operator, or farm manager no sooner than 30 days, nor later than 60 days, after activation of the well.
8. The Lower Republican Natural Resources District encourages that all new non-domestic water wells designed to pump 51 gallons per minute or more be constructed with adequate free space in the pump discharge to accommodate a flow measurement device.
9. Any person who commences or causes construction of such a well for which the required permit has not been obtained, or who knowingly furnishes false information regarding such permit, shall be guilty of a Class IV misdemeanor. {46-602-01}.
10. This permit does not register the well with the Department of Natural Resources. All wells are required to be registered with the Nebraska Department of Natural Resources within 30 days after the well is completed. If possible, mark with a flag the well site in the field.

Dear Mr. Meyer,

We have information on file that you obtained a permit from the Lower Republican Natural Resources District to drill a water well in the SW1/4NW1/4 of Section 17, Township 2 North, Range 10 West, in Webster County. The permit was listed as LR-06-170 and was approved on 2/14/2006. At this time we do not show this water well as being drilled and/or registered. If this well has not been drilled we will VOID this permit. We would appreciate your assistance in verifying the status of this permit. Please complete the following and return this letter to our office.

The water well described in permit LR-06-170 was drilled
_____ (date) by _____ (contractor).

The water well described in permit LR-06-170 was never drilled.

This well was not drilled and a replacement permit #LR07185
was issued 3/8/07

Again we appreciate your assistance with regards to your permit. If you have any questions or concerns, please do not hesitate to contact us.

Sincerely,

Kristi Coe
