Ok. I want to get this answer, right, since from what I understand, it is a fairly common question in the Republican Basin these days. I stopped over, but I see you have folks in your office. Can you call me quick or stop over here when you get a chance? I promise not to take too much time.

Bobbie,

The Department paid the Bostwick Irrigation District a lump sum and we don't know how the District dispensed the money. I think the same is true for the water the Republican Coalition leased from various irrigation districts but I am not sure. It would make sense not to pay the CREP participants but it's up to the irrigation districts.
Pam

Bobbie,

Can you help me out with this question or point me to the right person.

Thanks,

Subject: Question

Ritch,

Could you check with NDNR and see if CREP acres will be eligible for the payment for selling their water to the state or NRD? This question is arising at a lot of meetings and no one seems to have clear answer.

Under the water use contract part 4 subpart 5, it looks as if they are not able to sell their surface water. Let me know what you come up with. This may already be decided somewhere but if it is I am not aware of it. Thanks for your help.
