Subject: RE: Legal assignments from RRCA

The 17th works for me. I chatted with Jim W. yesterday, who suggested Kansas now has a different position on the non-fed reservoirs below Harlan. This does not appear to be the case to me, and evidence we already factor in the evap from these into the Neb calculations should make it a minor issue. I have not done any work on the water use in another state question. I have visited with Jim for a rudimentary understanding of the mound/engineer issue. What's up with the question on splitting evap from Harlan (Mike's email)? Is this another one for the legal agenda? It was not previously identified as an issue/agenda item anywhere I've seen.

Ron,
How timely. The 17th works for me if it works for you. Why don't you set up a meeting with Jim and we can go over everything to prepare for the meeting. I suppose since I am the official member of the committee I should respond. Ann can appoint you officially when she gets back in time for the August meeting.
Pam

Subject: Legal assignments from RRCA

On November 15, 2006, I sent out the attached proposal concerning a regulation and MOU re use of water in another state.

On November 16, 2006 John Draper sent you a memo re: evaporation from non-federal reservoirs below Harlan County.

To date I have received a response from Pete on the first issue. To my knowledge I have not received any other comments or responses.

In order to move these issues forward, I suggest we have a legal committee conference call. I would suggest **July 17 at 10:00 a.m.**

If that doesn't work, I am available most of the week of July 16.

Let me know what works for the two of you.

Thanks, Lee
