

8/29

AB/TR 1/c

Could happen if NRD wants.

If want to say wells negs - drilled 9/4 19/1 -
would do GCS & in order to reduce
risk it'd put in problem area -

will consider as part of baseline re: F/A.

Adding acres of CU - could trip into F/A.

Up to NRD to decide -

indiv. offset?

NRD could take risk - don't make

indiv. do offset.

[But - if new wells cause problem -
would have to do offset in plan.]

[AB did not correct Sen. Flood's ~~in~~ inaccuracies]

Tell them:

1) Where hear '01 date?

2) Was intended to be ~~sent~~ sent to
them in a meeting - for their info only & did

address NRD
options - but
Doesn't address
offset.

→ was to be set out as press release
or otherwise get better than DNR.

AB said will have to do offsets if address e
impacts...
