

① Illegal well - regis. as irrig. well
(Recently) ←

② City Well case repts. <unregistered>

③ Illegal well registered. → only spring protest if regis.
<4 in 1000 for spacing>

City could
make his
decision
- needs permit
or illegal

Series from '93 - no irrig.
Looks like stock well

WRD - Well's not permit - not sure replace. a new
SF - Q - as new well rather than
replacement - B/c City do replacement
if illegal.

SF - Haven't responded to (L)

AB - Legal B/c regis.
But illegal B/c spacing.
Q = Replace well

AB Don't think should allow to do it.

Illegal well -

SF - They'll drill a new well - not sure replace or new.

df has inq. - NRD buys it + gives permit for new well under variance.

SF - If city signs waiver based on down + new 1000 ft. away -

TH - Were going to buy his land.

Regis. well - but illegal well. Since regis. well - can't redrill elsewhere else + have replace. well.

SF - df orig. can't become legal - shouldn't allow replace.

AB - druid. should have known couldn't be regis. w/ var. spacing.

TH - NRD going to give them replace. well.

SF - Permit for new or replace. - well accept it.

308-436-7111

RP-TH-AB-SF-Call #2.

Shuey well - been in a long time - not sure what used for -
not regio.

Scottsbluff city well - regio.

Shuey well 4" 1000 ft.

Asked re: regio. well - we allowed regio.

Then - set (C) re: "illegal well, tho regio." Give options.
No resp. to (C).

Q - if well regio. but illegal re: viol. spacing - allow
it to be replaced?

TH hears w/ NRD - willing to give permit re: replace
well

AB - Alternative = can't replace illegal well -

NRD can if rule allow - will set up
database to recognize.

Shuey want to drill another well not a viol.
& call it replace. well.

TH - drilled in 50's.

AB - Know used for irrig.?

TH - They say yes. 4" pipe.

Land under Winters Creek Canal Co.

RP - NRD cont. acres?

TH - No.

RP - Don't know re: replace illegal well.

SF - if go to city & get waiver -
abandon replace 1000 - go thru well
spacing to get.

SF - No one convinced need irrig. going on.
Sounds like wants irrig b/c of city
concerns - get real \$.

RP - Not taped as irrig. - a scam.

AB - Agree no replace well for illegal well?

RP - Correct - Could do what SF said to get
it legal, tho, + then replace.
But NOT if irrig. well if wasn't
previously irrig. well.

RP - Waiver from city & don't get replace. well.

TH -

AB - if city gives waiver - a legal well.

AB - Comes down to waiver from city.

SF - Told - Stock well

- Spacing permit (would have to
show no harm).

No harm size of well

What used for

look @ aquifer.

* Pub. Int.
Issues.

{ Would also look @ city spacing
policies.

SF - Could have stock / domestic in 1000 ft
if properly regis.

AB - Back to a re: what doing w/ it before??
(re: no han)

TH - by Cullen.

TH - I need to look @ hx of land -
see records of puris.
Will visit w/ city re: waiver. If
writ - he needs to apply & show no
han.

AB - Talk w/ city + talk w/ Sherry. If they
choose to do - you can help them
get what need.

SF - NRD can condition permit for new well -
not sure we can.

TH - Can DHS give variance?

FF - Could re: abandoned. (Cult or irrig.)

RP - Could leave a stock or domestic -
if not - needs permit for NRD.

SF - TH - letter? Dept. to do letter + require

tie for response.

need to be sure Cacek or Bd. ...

AB - Send memo to NRDs re: ~~what~~ what
is illegal well + cut regis. illegal well
* you may have different rules to allow replacement.

TH - This guy thinks regis. well = transferable

SF - Do package thing.

→ TH to ✓ w/ NRD.

Conf. - added for Cacek.

→ Regis. become legal - but not as to spacing.

46-602(9)

Spacing + construct and square-

SF - no replace. well if orig. = illegal
Options

1) well - spacing permit app. - abandon orig.
+ drill somewhere else if city wants

2) B/C F/A / O/A - NRD in grants

permit - try wait to be sure no T
in CU

3) Permissibility

4) Chg. regis. so just a stock well.

46-706 - illegal water well. (of def.)

if not in compliance of state - an
illegal well. (Well-spring = applic. law)

46-602(9) - "illegal til regis."

Meets regis. - but may viol "other",
Just as of regis.

RI - Apply for variance + get waiver.

SF - Condition - no: hole well beyond 1000 ft. spring.

RI - City may do B/c told Dept. of
Health well under their control
& it would be abandoned.

AK - if request variance - we'd require
well abandoned... & in control.

SF - Write Study one more + give options.

AB - Variance it shows no harm.

SF - Not sure we'd get B/c quality (I).

AB - Convinced an irrig. well that been used?

RC - Not 100% certain. They swear is. Irrig. well - only need to show 2 acres.

AB -

RC - Can't pay how the could pay price (4 replace well)

SF - Took that out.

RP - NRD could condition it +

he has to supply reasonable proof re: hd. use

make the case + tell you ~~how~~^{how} much.

TH says all grass now., # acres irrig.

SF - Could limit to 4" well., Do all sorts of limitations.

RP - One acre certified - not a problem.

RC / RP - Could require it to stay in grass so no ↑ in CU beyond what was.,

TH - Can't catch one thing.

TH - Guy paying for natural lake to pivot for corn. Told him no.

SF - Will write © to Steen - will copy Tom, Ron + City + set out options - will give 60 days to respond.

Send certified.
