Gentlemen:

The Environmental Trust is reviewing some of the Grant applications Monday November 24. The Meter Cost Share request is one of them. They have requested a current tally of how many meters have been installed and how many still need to be installed in each NRD. They also asked where these meters are or will be. I am not sure the last question is easy to answer, but the first two are the most important. Could you provide me with the most current info you have.

Thanks,

Mike
