Acknowledgments	3
Background	5
Problem Statement	9
Purpose and Objectives	10
Methods and Procedures	10
The Study Area	24
Blackwood Creek	27
Frenchman Creek	29
Medicine Creek	31
Red Willow Creek	31
Findings	33
Streamflow	39
Agricultural Crops Grown	41
Precipitation	42
Irrigation Development	45
Conservation Practices	45
Results of Regression Analysis	48
Frenchman Creek	53
Medicine Creek	57
Discussion and Conclusions	57
Index of Figures	5
1: Republican River Basin	11
2: Location of sub-basins studied	12
3: Gage 4-digit ID numbers	15
4: Sample areas	18
5: NRI sampling points	19
6: Registered well distribution in the study area	20
7: Film overlay used to define sub-basin areas for counting of center pivots	21
8: Primary precipitation stations	24
9: Typical dry streambed....Blackwood drainage	25
10: Blackwood watershed as defined in the NRCS Watershed Plan	27
11: Soils of stream gage drainage area in Frenchman Creek sub-basin	29
12: Drainage area of stream gage above Harry Strunk Lake	30
13: Preventing erosion and flood damage are key concerns in Medicine Creek	31
14: Red Willow drainage above Hugh Butler Lake	32
15: Terraces and gated irrigation pipe in the Hayes County uplands	33
16: Comparison of streamflow in studied sub-basins	34
17: Blackwood Creek surface/base flow comparison	35
18: Frenchman Creek surface/base flow comparison	36
19: Medicine Creek surface/base flow comparison	37
20: Red Willow Creek surface/base flow comparison	37

Index of Figures (continued)	
21: Comparison of streamflow/baseflow changes	38
22: Percent changes in average flow from initial to final 10 yrs.	39
23: Comparison of cropping trends	40
24: Precipitation trends within the study area	41
25: Relation of irrigated acre increase with groundwater irrigation development	42
26: Center pivot development	43
27: IR satellite image of Frenchman sub-basin	43
28: IR satellite image of Blackwood sub-basin	44
29: IR satellite image of Medicine sub-basin	44
30: IR satellite image of Red Willow sub-basin	45
31: Scatter plot of center pivot development vs. terraced acres in sampled area	46
32: Time-distribution of conservation practices	47
33: Relationship of streamflow with acres of terraces (Frenchman)	51
34: Comparison of predicted and actual streamflow values for Frenchman Cr.	52
35: Comparison of predicted and actual baseflow values for Frenchman Cr.	52
36: Comparison of predicted and actual streamflow values for Medicine Cr.	55
37: Comparison of predicted and actual baseflow values for Frenchman Cr.	55
38: Co-linearity of terraced acres ...and streamflow change (Medicine)	56
39: Estimated water table contour (Frenchman Cr.)	59
Index of Tables:	
1: Blackwood Creek streamflow/baseflow summary	34
2: Frenchman Creek streamflow/baseflow summary	35
3: Medicine Creek streamflow/baseflow summary	36
4: Red Willow Creek streamflow/baseflow summary	37
5: Streamflow changes in acre-ft. and percent	38
6: Sample data from aerial photos	45
7: Contour farming and terraced acres	46
8: Results of regression analysis of Frenchman Creek	49
9: Results of regression analysis of Medicine Creek	54
