

① How Does adjudication process work on junior groundwater rights.

① Can a surface user place a call on junior gw irrigators?
How is that handled?

② AZ states to the west characterized by more overlaid runoff and less Baseflow?

③ Is most surface water - groundwater interaction via Alluvial Aquifer systems in the mountain states?

④ IF NEW OR EXISTING groundwater permits are adjudicated or conditioned, what is the basis? Is it the actual impact on the stream at that point in time or at some future time. A/E cutoff line used?

⑤ Water Banking - How are third party impacts really handled
