

Dissertation on the Subject -

Final Review within a month a polished document

Reference of Masters Thesis - Gerald Sauer

BY Time lawsuit is filed you're in trouble

Prevent lawsuit from being filed

Normal Model is someone files lawsuit to everyone reacts

Policy led by Stakeholders on oversight basis

Lit survey Idaho in other areas

Stop Issuing permits what about Colorado

Idaho if call made we don't willy nilly start shutting off wells & there is not quick answer

In eastern Idaho lawsuit will work with you to develop mitigation plan state in middle

All Basins where a probability trying to get ahead where lawsuit they are mediator

Eastern mostly Feds river

Resolution has to be generalized so it fits no matter what geohydrologic

Feds to Local are wrong entity -

~~Having~~ Concept of GW being within umbrella of Appropriation ~~document~~ is fundamental to resolution

For GW can't do much without being built

Business in Col. F to complex to admin fundamentally Flawed.

Only entity equipped to appropriate to handle is State is huge problem

one b,

No active viable reasonable cony, admin like Colo & Arkansas
Forced by

don't have

Arizona has one River Pseudo

N. State of Arkansas

X Cal, Finally agreed upon solution

Gerald sch/KE May 2000 "An Evaluation of the
Conjunctive mgmt of SW to SW Resources in Idaho
review of Idaho Master's Thesis
