IN REPLY TO:

Robert B. Swanson, Director
USGS Nebraska Water Science Center
5231 South 19th Street
Lincoln, NE 68509-4676

Dear Bob,

Thank you for forwarding two copies of Agreement for Gage Transfer No. 8-8626-06853000 for transfer of gaging station infrastructure at the old Republican River near Guide Rock streamgaging station. You have asked that we return a copy of an engineer's inspection report with the signed copy of the agreement. It is our intention to have an engineer inspect the infrastructure and then decide on how to use the station and how to address any design, structural or maintenance deficiencies prior to having the engineer provide you with a report. Because of the time likely to be involved in completing this activity there will be some delay in providing you with a copy of a signed agreement and engineer's inspection report. Thank you for your willingness to transfer the station infrastructure. It is our intention to inform you of progress as the inspection process proceeds.

Sincerely,

A handwritten signature in cursive script that reads "Brian P. Dunnigan".

Brian P. Dunnigan, P.E.
Acting Director
