I do not believe that Don's new language on certification by the Natural Resources District is required for this section. The notification is by DNR to the landowner and NRD is that the well cannot be used. Any use of the well must be in compliance with NRD rules and not have an impact or any use of the well be in violation of the statute. I do not have a problem with Don's other recommendations.

Brian

I have reviewed section 001.03E and I believe it is too vague as written. I have provided clarifying language which would address my concerns as I discussed in our conference call today. Let me know if there are any concerns with this approach.

Don

Good afternoon:

Based on our conference call this afternoon, I have made further revisions to Section 001.03E in the attached. Please let me know ASAP of any further changes that are necessary.

Dean, have you heard any feedback from the NRDs on the draft I sent to you last week?

12/19/2005

DNR 014196

We hope this can be addressed at the WPTF meeting this Thursday.
Ann
