

Below is the fee schedule for the cost of water applications in Utah. Historically this money has been deposited in the general fund. However, in the 2002 Legislative session a bill was passed that allows the State Engineer to set up a dedicated credit account and deposit the fees collected by the Division of Water Rights into it. The funds from the account can be used to cover all costs associated with publishing the public notice of water applications in the local newspapers. This is an issue that presented numerous problems, primarily we are always several years behind in getting adequate funding to cover ever increasing costs. This is our first year under this method, but it appears to be a very good method to pay for these type of costs. I believe that our fees are perhaps low and could be raised to better reflect some of the costs of processing the applications.

Fee Schedule

Revised: September 26, 2002

Fees for the following type applications will be based on the greater of FLOW-CFS or storage (ACRE-FEET), but not both:

- Application and Temporary Application to Appropriate Water
- Application for Temporary and Permanent Change of Water
- Application to Exchange Water
- Non-Use Application
- Diligence Claim (+ \$200 for field exam)
- Underground Water Claim (+ \$200 for field exam)
- Groundwater Recovery Permit
- Republication after Amendment of Application

FEES				
FLOW-CFS		ACRE-FEET		FEE
0	0.1 cfs	0	20 af	\$ 75
0.1 cfs	0.5	20 af	100	\$100
0.5	1.0	100	500	\$125
