

WPTF - 5/31/06

sir on bd - require repts + can have Sunset  
req'nt to re-up every so often.

MO = had the re-upped = need higher 20.

If get dedicated fund - get data +  
link to care by putting things in there  
are important to be. Education = key.  
Equal obj. to include education?  
hope for this group - hope need broader.

Jim Meiser - "Paying for convenience."

Structure of fee in place now. Not ok for  
this to be Western / Reg. / Platts (I) is a  
state (I).

JB - Recog. of work it took to get funding.

Also frustration re: do we need to continue to do  
this. Scenarios / specifics - education is a key.

(\*)

(\*) Start to think re: specific scenarios.

To move 4/ward: rather than convene separate  
Committee - have existing committee address  
devel. more spec. info around needs / devel.  
educ. approach.

JT - have pretty good est. of cost. -

JB - specifics needed?

JT -

DK - State recalls. # to get to '97.

JT - Cost of Reg. Basin - retire assets, District  
travel cost to get back to '97 on Platts.

RB - Can i.d. igas - probably can't take all the way.  
Can get background info.

JB - GW + SW Subs. work separately then coord. +  
jth talks about benefits.

Jody Gittins - To deal w/ Senatos - Convert #'s re;

econ. impact of A-B-C - + take it  
as equivalent of proba or Linda losing  
one business.

Relates loss of mine to eastern part of  
state.

Sam Lag. - That I can tell the bus drives that.

Dave Nelson - Lots of ideas - no plan.

JB - Plan = combine GW + SW Subs - look @  
ways - alternatives - benefits - meet 1x  
B/4 now + next time TF needs.

DL - Who does what Jody G. suggested?

JB - Think about messaging later.  
Good = compelling arg. for fed. funding.

JR - Good step.

At one point - funding subcom. plugged back in.  
TF as whole - or Exec. Committee books  
up w/ ?? More done that way?

JB - - GW + SW begin effort. meet at least 1x.  
Coord. 1x < jr. mtg? w/ Funding? >

B/4 tentative next mtg. (Aug. 7).

Prot. = Exec. mtg. = generally full TF.

DS - Designate a writer - group can respond.

Lloyd Nelson -

Average flows @ the I-S gauged + average flows now.

But - committee had to recover to look @ city in rule.

Significant for our basin.

AB - Process using - wouldn't recover committee, but would have final hearing + Dept would determine whether city rule following hearing.

Look @ Approp. data on permit (if for irrig.) + see % of CIR they could not meet. If still the same - not F/A.

LN - Would like to see in black + white ..,

J Turnbull - "Good luck"

AB - When committee is - transfer had agreed to move ahead .. on this piece - (Part C) looking @ avail. on date of approp. - committee is agreed on piece.

Would like to go to rules bring a just that piece - + continue discussion on other aspects of rule.

Dave Nelson - Why give permit if can only meet 20%?

AB -

DK - Concern re: 83/ES + re: orig. rule - when diversion info avail. - use that instead of assumption.

AB - willing to go there.
