

TB/NRP ②

① - GW use priority based allocation
1/2 of surveyed said 1st in time - 1st in wt.
Would like option, as NRD, to do diff.
allow based on time period in which
developed.

< A lot of development B/C issuance of
water rights > → Don't think S/B to give
new rts. as "older" irrigators.

② Recharge.

Re: #1 - TC - shades of gray. No prob. re:
allow NRD's to regulate wells diff. based
on date going forward. But concern
re: B/C jrd. + legis. adopted cover,
rts. doctrine - to modify based on
B/C date could be cause for a taking.
Arg. = changing rule after wells drilled.

2nd (I) = believe you can do already.

Q = Date Sen. Schrock put in on Regul. = ?

A = No. Could establish date today -
problem = going back.

Q = Re: Regul. - chg. law re: after date?

A = No prob. re: later date.

Q = TB has auth. to do today -

A = could do looking 4/ward under
1MP.

Use date

Estab. imp today + use that date.

"Double"

~~Q~~ Q = going bad.

Well rules of 20 yrs. would be changing fundamentally.

Q = completion date or regis. date...

Clayton comment - my tie tells any steps to put GW 1st in time / 1st in rt. - d will object. B/c early irrigators 80% of land threatened by 1st in time 1st in rt.

JC - Wells constructed after - so up to disk, to make decision.

Lloyd ~~Q~~ - "Constructed" is vague.

DC - "Commencing construction" defined.

JC - "Constructed"

drilled - cased - capped
Lloyd - well put in - no pump or pivot -

What happens? Permit 5/10 pulled - but state thinks he has a registered well.

JC - 1 yr for "construct + equip"

RP - Ask JC + AD + DC to look at + bring back.

Lloyd - we considered working to resolve. Want Dept legal counsel to look at.

RP - Could delay or go ahead of recess
later.

A lot are still drunk. Other business
won't be that clear.

Jodi - Referrals to Exec. Bd + Parking Lot IDs

①

②

③ Inc. Prog.

referred to
John + Dave ←

④ Chang. re: "costumed"

⑤ = Al's Q re: "transfers" - refer
to transfers meeting.

Treaties had differently < TB NKD >

AB - Parking Lot IDs remain

lag effect

Paying for water not getting.

NP - Add to agenda @ Exec. Com. +
have the prioritized for return.

ES - Exec. Bd to discuss all +
report back.

Q = 39 inches over 3 days.

You can change @ any time.

Hard to plan when don't know how
much you'll get. Consensus is

prop all you can ^{3/4} won't get next
yr.
