

July 13, 2004 MRNRD Board Mtg.

Acres Certification Violations

Add Acres Group

Late Group

1 irrigator wants to certify entire quarter + 30" that is under F.V. I.D., but hasn't received water supply from I.D., so he needs GW to irrigate.

Variance Request Determinations

Apparently land can be irrigated even if it doesn't have a certification (must be like URNRD satellites)

Ground Water Management Rules + Allocation Schemes

Postpone Any Action on Rules + Regs.

Idea to get all of each board together to finalize plans.

Public Comment -

- A. Keep it simple, with reasonable reductions
- B. Best way to handle reduction is retire acres
Should let everyone cut back 5% or 10% from each farmer's traditional use
- C. Doesn't want plans implemented based on drought period situation. ^{Even 30" to 20" would be a hardship}
- D. Wants Twin Platee NRD to do something to stop the development
