Review DNR spreadsheet (attached)

Tri-Basin issue was brought up - Ann showed a spreadsheet comparing Tri-B's consumption with the GW credit <sup>mount</sup>

Due to sig. fig. treatment in excel it looks like MRNRD share (without Tri-Basin) is 30.64 (31%) instead of 30%  
MRNRD Manager took the usual cheap shot at "moving numbers"

? Does MRNRD have 100,000 Quick Response acres?

Derrel Martin's pumping numbers are still being questioned. Roger recalled that our records indicate that avg. pumping was 12.8". The NRD folks say it was more like 16-17".

★ MRNRD must have a legal opinion from DNR that would indicate they have authority to raise a fee per certified acre to use with dry year leasing.

★ July 9, 2004 10 AM at McCook Fairgrounds for a DNR model Meeting at MRNRD request.  
RKP appearance - Make point of what happens if NRD does nothing

★ July 13, 2004 Board Meeting  
7:30 PM Meeting in McCook  
RKP appearance

LRNRD est.  
242,000 pumping  
330,000 est. cert. acres  
 $(242,000 \div 330,000) 0.95$

★ Look for Brad's brown folder w/ files that may have been left in Lincoln at hearing.

$\times 12 = 8.36 \text{ inches}$

★ Draft a mass mailing to explain IMP issues to the populace

avg year 50 days of pumping }   
 last year 100 days of pumping }   
 } need total comment by MRNRD farmer
