

Fall 2004

URNRD - review + comment
their draft imp.

Tri-B NRD -

- explain seepage diff. between cohyst + RRCA incl. origin of mound
 - what is required for consultation ^{of parties affected}
- Phase 1 needs a good gw level monitoring system.

Phase 2 - what "triggers" will actually work to prevent a "negative" balance of pumping vs mound credit

Need to come back positive within 3 years

Phase 3 - ?
Dec 15 is rolling around
