

Cambridge, Nebraska 10:00 AM
RR NRD / DNR Technical Meeting
Dec 21, 2004

Req. - Send Sid a diagram so they can design out parts
to send DNR

Cert. Acres

- Tri-Basin: Tax, Insurance, FSA 578
Assessor's Parcel IDs

- Mid. Rep. 1993-2003 by Claim & then matched FSA & Assessors

(Kim Menke - GIS Steering Cmte. Issue of Assessors)

- Upper Rep. NRD - 1980 - last adjustment to cert. land, acre.
No new adjustments

- Lower Rep. 1999 - end of 2004
NRD

Old - due Oct. 1, 2004

New - due Dec. 31, 2004

What constitutes watering? once around
Truck water counts!

Acres will track with the Assessors records -

no tax payed = no cert. acres (can lose acres)

No transfers allowed

* - Get Brad to give list of District Irrig. areas so MRNRD can keep track
of allocation

* - Owner summary sheet - look to see if we can make it
more friendly to normal people - look for more efficient
print formatting

MRNRD - 2/3 wells gps'd - hopefully
gps = spreadsheet X Y

URNRD - most are done

LRNRD - part of certification clean up operation

Tri-Bas. - gps is still in progress

Conversion from flood to pivot - well contractors need to
send an update for the smaller gpm.

★ In database - can we have codes for what the source
of the location

The footage and coordinates are not always shown
correctly. Does the mapit system use the footage, if
available? Need more accurate info for spacing.
Advocate using photos to corroborate well locations

★ Make map to go with update records sent to owner
