

January 30, 1941.

Mr. Harry P. Burleigh,  
Hydraulic Engineer,  
Bureau of Agricultural Economics,  
Amarillo, Texas.

Dear Mr. Burleigh:

We, the Republican River Compact Commissioners on the Republican River, meeting at Topeka on January 28, examined the tables which you submitted to us on the 27th indicating the approximate recommendations for consumptive use of water by basins in the three states, and find that the total estimated annual consumptive use of water is within the amount of the water supply available in the basin above Hardy, and that the proposed allocations in each of the several states fall within the amounts which the Commission may see fit to allocate to each state.

Please accept our thanks for meeting with us and supplying us with these figures.

Sincerely yours,

Geo. E. Knapp  
Commissioner for Kansas  
For the Commission
