Re: Republican River Compact
Listing of Technical Studies

Dear Fellow Engineering Committee Members:

Enclosed please find documents related to an assignment of the Engineering Committee to compile a list of technical reports related to the Republican River hydrology, geology, and groundwater resources. I apologize for the significant delay in getting these materials to you.

The enclosures include the following:

1. The individual lists submitted by each state in accordance with the resolution.
2. A compilation of the three lists sorted by title.

I would ask you to review the compilation and reasonably insure its completeness and accuracy. We did our best to link common titles but may have missed a few. The compilation includes designation of which states hold each document. These may not be completely accurate and I would ask you to review as well.

There are a number of documents that list no author. This is particularly true in the case of Colorado's listing which was more of a listing of files than individual technical reports.

Ms. Ann Bleed
Mr. Allen Berryman
December 17, 1993

Should you have any additions or corrections of any type, please let me know. As you are aware we were asked to complete this assignment by November 1 and so we are well behind schedule. I would ask that you to strive to provide me with corrections by January 7, 1994. I would then seek to finalize the listing by the middle of January.

Should you need anything else related to this assignment please feel free to let me know.

Sincerely,

David W. Barfield, P.E.
