Jim

I just received a call from Cindy Fay with the NOAA weather service in Hastings. She informed me that the USGS moved the Sappa Creek compact station several miles upstream of the original station.

Did the USGS notify anyone that this was going to occur?
Seems to me that the USGS should have ok'ed this with RRCA first.
My recommendation would have been to move it downstream closer to the confluence.

Brad

Cindy,

The new site's dcp assignment is DDCB007C. The transmission is hourly at HH:15:10 and is binary format. The data string is 8x (stage, battery, stage, battery,.....). This represents the current 4 15 minute values and then the redundant 4 15 minute values from the last hour. The stage values are gage datum, John Miller (North Platte field office)

will be able to supply you with the datum elevation when he runs levels to the site.
The site is located a mile west of Stamford and about a quarter mile south. The lat/long
is 40 07 39 and 99 36 42

Let me know if you have any questions.

Dwain

Sappa Creek - Stamford

Hi Dwain...

We stopped receiving data for the Sappa Creek near Stamford on Monday.
Do you know if there is a problem?

Thanks!

-Cindy
