- \* KS questions  
TBNRD
- \* LIDAR
- \* Annual Meeting - Imperial or McCook?

talked about  
McCook &  
Imperial

PRESENT

James Williams	Brad Edgerton
Jason Kepler	Paul Proester

Dan Smith  
Bob Merrigan  
Stacy

Dan mentioned that they have needed some help with their Access database - wasn't get up to close out an allocation period

- Dan: Are you getting what you need
- Paul: Sent whole database. Everybody sends different data but he can extract what he needs
- James: Asked for shape file of acres with the water put on each
- Stacy: They are about 1/2 done time wise etc. willing to look @ Dan's digitizing tools

Dan  
Paul

Are you using our lat/long or states?  
if it is reported by MRNPD we use MRNPD

Dan  
Paul

Are you wanting zero-value wells  
Yes < wants volume from every well &  
volume on the certified acres >

< Pam will be working to coordinate the  
state database with the MRNPD database >

< Inactive well is a registration process >

Paul

Agreed to look back @ last year's annotation  
before calling NRD

Bob

They use the designation "unused"  
The well still exists, but is not pumped  
& hasn't been pumped in years

Dan  
Dan

Inactive is a registration status - different than unused  
Asked Stacy if we report unused wells with  
zero certified acres

Stacy  
Dan

Yes, it's in the database,  
Paranoid out there - they want seal marginal  
wells

Bob

Sometimes they'll split acres and put a  
portion onto certified acres - but they  
are not new certified acres - they moved.

< discussion, including the fact that Pam  
needs to deal with the database >

Paul  
Dan

Will this change on an annual basis  
Yes - permanent transfers will be  
reflected in the database

Dan  
Paul

< Discussion of Quick Response vs. Alluvial  
Part of the problem is the 1-mile grid  
in the model.

Vince Drenson took @ look @ which wells  
were truly alluvial.

~~Paul~~

< LIDAR discussion - will give us  
stream bed elevations >

Dan

Is there any need to get ground  
water elevations?

The MRNRD takes 130 measurements  
They have no more continuous data  
recorders - they still read the  
6 or 7 of the wells that had data recorders  
The Upper Republican NRD

jacque delacek ("Jack Sed Logic")  
@ USGS gets the data.

Dan

MRNRD can survey in the wells  
with survey grade equipment

Their budget year is: budget is official  
in September although it started in July

→

Wants Republican Basin plan regarding  
their budget

Paul  
Dan

Asked regarding crop data  
Sometimes it's easy, sometimes it's not

Dan

< Discussion of ESA data sharing >  
If you get it, can you share it with me?
