CBCU Paper

← Justin's thoughts on work to be done
 (do we want to talk to the other states)

Brian - will Justin need anything additional

→ Just whatever we want to do in terms of an expert report

This is 3 person's expert reports under one heading

Justin - It's OK - better in some respects

Mike - What about Supreme Court

Consumptive Use

Brad will write up a plan for augmentation / CBCU

The work
 PR = { Arbitrator
 States
 NRDs
 The report
 More run's
 - NRDs

Reservoirs - we will provide in 10 months

Brad will look @ shape file

We will look @ each well

I will list out issues - we need to know how much

THE WHOLE STORY NEEDS TO BE TOLD

Justin

similar

Needs the same thing w/ the remedy
- summary as to why it doesn't work

① IAMP

- summary, explanation
- what is an IAMP
- how it works
- 90% reduction
- allow us to do X Y & Z

* James & Flatwater

- state statute - NRD & state comes together to
- original IAMPs
- how it works under current IAMP
- " " " " proposed
- include dry, medium, & wet accounting

②

What US wants us to do takes us too far the other way - run it using current " " " proposed

using 2007 & 2008 data

They determined acres since 2000

- made it look like 500,000 acres were added - true in lower

Jim S.

Pointed out that, if after 2004, we implemented US remedy, we would have been in compliance 05/06 & 03-07

Need a paper on:

Noncompliance Reasons

- ④ extent of drought not recognized

① incorrect accounting

② drought

③ rules & regs were not in place

④ meters were not in place

We don't need the same level of scientific rigor - stand alone now, but may ~~have been~~ be folded into the JMP

⑥ we now have a formal forecasting process

Justin needs supporting documentation for each excute

CO harm to NE from their noncompliance

→ What's the result

→ Of the 100,000 AF we are short,

A little bit hypothetical -

for example, what will we do w/ CO augmentation H₂O?

HS harm - out of compliance on the Arikaree if fix Haigler

If we move the old accounting point on S. Fork

Document of what were working on the issues & players & what each person is working on.

Brad - SW data didn't get posted to the website

Summarized
All issues
explain it in
introduction &
have a complete
2003-2007
spread sheet
