

See Ann's email

As part of the estimate of H<sub>2</sub>O to allocate,  
used basin-by-basin approach

Stick diagram of Republican & tribes  
go into the accounting spreadsheet

Consumptive use is diversion - return  
+ BW CU

Note reservoir

Medicine - diversion is above gage, return  
is on the main stem

Else tail of streamflow

\* Goal is to develop a table of allowable depletions  
→ to get allocation for a particular NRD

Provisional allocations, monthly, based on  
monthly inflows etc.
