Point.

Stated that the LRNRD should consider reviewing municipal use & offsets more often than once every five years

< much discussion >

< Discussion of the ownership of wells in Cambridge

Turns out Cambridge signed a contract to provide 350 gpm continuous flow. Cambridge assumed it was in case of fire etc. (emergency)

(Statement that MRNRD doesn't come within 46-740).

the City of Cambridge
Ron asked if they agreed to something that they didn't have the authority for so it would not be valid.

Harriet LB Contract is dated 4/21/2006
1226 - July 2006 so 46-740 was not
in effect until after it was signed
"force majeure" would be in effect.

Bill Base These communities are just trying to survive.
It's like leaving the gate open and planning
on the cows not getting out.

< does plant know the city is on the hook? >

Mike -> yes; they hired Blochwell Sanders
How many acres?

Mike ~ 800 acres, assuming 400 open flow

Harriet In addition to the 350 gpm they have
their own wells - so they'd have to
offset mine

-> They provided maximum total use
This doesn't include returns

< Big discussion of certification & digitization >

Break 10 a.m.

10:12
John Turnbull
Mark - Mayor
Chris - Miller

City of Cambridge

Chris Miller - Edward plant connects to City
- would drill 2 wells (new)
- industrial transfer permit on the 2
- contract for H₂O on demand

BIC - high impact wells closed; use moved

City of Cambridge - cont.

Harriet

Have they researched breaking the contract
(unknown - attorney on vacation)

Mayor

In prior meetings of City Council
he said he thinks we can beat it in court

Chris

Who's in charge here? NRD or DNR?

Mike

NRD - come up with plan
↳ board reviews it - lead agency
DNR will review

June 24, 2008 letter Pam Anderson to
City of Cambridge
