Potential IAP Goals - Tina typed on laptop

AB: Is there anything we can do for 2007?

1) Leave carryover + allocation alone

2) clear out channel - need landowner's permission  
- for grubbing - COE 404 permit, but

Migratory Bird Treaty - bird nest season limits

Augmentators Say:

more than one time than a dedicated wellfield  
plus offset so you don't interfere with local  
farm operations

Wants to be ready with plans in February

Will take these plans to the

If water from the Platte basin is being consumed before  
it reaches the stream, then could we develop a  
method of computing how much of the imported  
water is potentially computed as CBCU against  
Nebraska.

Set up some informal meetings for sharing  
technical information and answering questions  
regarding phreatophytes, IWS, compact accounting,  
conservation measures, pumping data source  
comparison.

Thorburn - increase stream flow  
livestock dams → breach  
cut slots in terraces

Vegetation - study the benefits + use

Analyze Acres Reduction vs Pumping Reduction  
using appropriate questions on how reduced  
pumping allocations affect the river vs  
reduced acres as a direct management

Bose wants a guarantee that if they do more  
to reduce consumptive use that the state will  
accept it as all they would be expected to do.  
i.e. don't keep coming back for more

Jasper would like to consider compensat-  
ion for dam owners not storing and surface  
irrigators not diverting until we can get  
back in balance.

Nelson claims the NRD data would show  
40,000 AF less pumping than DNR data  
in the LRNRD

RRMDA - stakeholder group?

# Data Needs + Work Assignments

Augmentation  
Vegetation

Jasper

Clements + Thorburn

item #4 from Pope's

John Burge - Nelson's office (State Sen. Carl Santora)

Regulation

DNR model best result for compliance in 5 year

Equity Committee - URNRD

Terryberry  
Palster

i.e. Fee Structure

LRNRD

Trembley  
Toby ten Bensel

→ Jasper is in charge Bose

SW buy-out (lease) - Ann Bleed

Must have plan in place by June '07

Technical Mtgs. w/ DNR + NRD staff  
and then the Boards: at least two  
rounds - not Mike T.

Basin wide meeting

Board meeting
