counties

Water level change from the average of 1981-1985 measurements, to the average of 2002-2004 measurements. Note: a negative value, as shown in blue, indicates water level rise (average of 02-04 higher than average of 81-85), and a positive value, shown in red, indicates a water level decline (average of 02-04 lower than average of 81-85).
