MANAGEMENT PLAN

For the Designation of a Water Conservation Area (WCA)
Smith Farms WCA; Greeley & Wallace Counties, KS
January 2017 through December 2026

In order to conserve and extend the productive life of the aquifer in our region and increase the value and viability of our water rights and water resources for future generations we, the undersigned water right owners propose the following management plan, pursuant to K.S.A. 82a-745 (WCA Law), to form the basis of a Consent Agreement and Order Designating a Water Conservation Area (WCA).

Expression of Conservation Goals
The goals of this WCA are to maintain production while enhancing profitability per acre-foot of water pumped, to examine and change current conservation practices as necessary, and to reduce water use over the term of the WCA from long-term averages. We, the water right owners, enrolling in a consent agreement under the terms and conditions of this WCA management plan will work towards these goals by exercising more flexible and efficient use of the water resource.

We, the water right owners are consenting to the terms and conditions of this WCA and commit to reducing water use for ten (10) years, in two five (5) year increments, through a reduction in the long-term water use average (2003-2012). The first 5-years (2017-2021) will be a 15% conservation factor and the second 5-years (2022-2026) will be a 20% conservation factor.

Water Rights Enrolled and Geographical Boundaries
The Smith Farms WCA shall include the following water rights and all points of diversion associated with those water rights. The following legal descriptions define the areas included in Smith Farms WCA in Greeley and Wallace counties:

<table>
<thead>
<tr>
<th>Water Right#</th>
<th>PDIV#</th>
<th>Sect-Twp-Range</th>
<th>Authorized Annual Quantity (AF)</th>
<th>Historical Ave. Use (06-15) (AF)</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

Totals 903,000 579,120

The current total appropriations authorized for all water rights included in the Smith Farms WCA are 903 acre-feet (AF) per year, with an average annual use during the period 2003-2012 of 579,120 AF. With a 15% reduction from historical use, the first (2017-2021) 5-Year WCA
allocation is 2,461.260 AF. With a 20% reduction from historical use, the second (2022-2026) 5-Year WCA allocation is 2,316.480 AF.

The geographic boundary for the place of use for the irrigation use is shown on the attached map and is described as follows:

<table>
<thead>
<tr>
<th>Authorized Place of Use</th>
<th>Total Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1478.73</td>
</tr>
</tbody>
</table>

**Authorized Place of Use Note:** The authorized place of use located in section 06-16S-40W is also authorized in Lot 3 in the Northeast Quarter of the Northwest Quarter (NE¼NW¼) & Lot 4 in the Northwest Quarter of the Northwest Quarter (NW¼NW¼). The land in section 01-16S-41W is also authorized in Lot 1 in the Northeast Quarter of the Northeast Quarter (NE¼NE¼), Lot 2 in the Northwest Quarter of the Northeast Quarter (NW¼NE¼), and 20 acres in Lot 3 in the Northeast Quarter of the Northwest Quarter (NE¼NW¼).

**Findings Regarding Groundwater Conditions**

We understand that the WCA Law requires a finding that one of the following circumstances be present within the area geographic boundaries of this WCA; specified in K.S.A. 82a-1036 (a) through (d):

a) Groundwater levels in the area in question are declining or have declined excessively;

b) The rate of withdrawal of groundwater in the area equals or exceeds the rate of recharge within such area;

c) Preventable waste of water is occurring or may occur within the area in question;

d) Unreasonable deterioration of the quality of water is occurring or may occur within the area in question.
And amendment thereto, exist, or include a finding or findings that the area within the geographic boundaries described in paragraph (1) has been closed to new appropriations by rule, regulation or order of the Chief Engineer.

We have been informed that the following conditions exist:

- Groundwater levels in the area in question are declining or have declined excessively.
- The rate of withdrawal of groundwater in the area exceeds the rate of recharge.

See the attached maps and figures supporting these findings and observations. Such attached documents may include:

- Location Maps
- Estimated Useable Life Maps
- Changes in Water Levels
- Summary of Water Use History
- KGS Observation Well(s) Data (if applicable)
- KDA-DWR Theis analysis report (if applicable)

These conditions suggest the advisability of implementing the Smith Farms WCA.

Due Consideration for Past Conservation
We acknowledge that as described in the law, a water conservation area (WCA) management plan shall give due consideration to water users who have previously implemented reductions in water use resulting from voluntary conservation measures.

We, the water right owners are committed to best water management practices and do not require any specific consideration of past water conservation in determining these allocations with the aim of, the conservation of the Ogallala aquifer and to preserve the viability of irrigated agriculture within Greeley and Wallace counties. As enumerated below we, the Smith Farms WCA owners, request that its further conservation under this plan be considered in any LEMA proposed for the area or in a subsequent WCA under the terms herein.

Corrective Control Provisions and Plan for Conservation
We acknowledge that the following corrective controls will be in effect within the Smith Farms WCA during the term of the WCA:

1) Water rights, at the discretion of the owners, may be pumped as directed by the owner, provided that:
   a. The sum of water use under all water rights combined shall be limited to no more than 2,461,260 AF from 2017-2021.
   b. The sum of water use under all water rights combined shall be limited to no more than 2,316,480 AF from 2022-2026; plus any unused WCA allocation from 2017-2021 WCA period up to 492,252 AF.
   c. All points of diversions are limited to their current authorized pumping capacity.
d. Water right #19986 cannot exceed 320 AF in any calendar year.

e. Water right #28296 cannot exceed 250 AF in any calendar year; and cannot exceed 1,050 AF (5 x 210 AF) within the 5-year periods of this WCA.

f. The two points of diversion under water right #28295 cannot exceed 373 AF in any calendar year; and cannot exceed 1,865 AF (5x 373AF) within each of the 5-year periods of this WCA.

i. The point of diversion located in section 14-16S-41W, under water right #28295, may use up to 240 AF in any calendar year but cannot exceed 1,115 AF (5x 223AF) within each of the 5-year periods of this WCA.

ii. The point of diversion located in section 13-16S-41W, under water right #28295, may use up to 167 AF in any calendar year but cannot exceed 835 AF (5x 167 AF) within each of the 5-year periods of this WCA.

2) The corrective control provisions of the Smith Farms WCA cannot conflict with the rules and regulations of the local GMD that result in greater overall conservation of water resources. If a Local Enhanced Management Area (LEMA) plan or an Intensive Groundwater Use Control Area (IGUCA) is formed after the initiation of the Smith Farms WCA, and the WCA is partially or wholly within the LEMA or IGUCA, the corrective control provisions that result in the greater overall conservation of water resources based on inches per acre and not based on percent reduction of average historical use shall prevail. However, any LEMA or IGUCA must give due consideration to the conservation achieved by WCA participants pursuant to 82a-745(a)(6). The Chief Engineer is authorized to amend the provision of the WCA to conform to any rules, regulations, or requirements that result in greater conservation of the water resource subject to the foregoing due consideration for past and current conservation.

We, the water right owners enrolling in this WCA understand we may gain the following flexibilities in consideration for our conservation.

3) Up to 1/5th (492.252 AF) of the annualized WCA allocation may be carried over and added to a subsequent WCA period after 2021; if unused during the duration of the first 5-year WCA period (2017-2021).

4) Up to 1/5th (463.296 AF) of the annualized WCA allocation may be carried over and added to a subsequent WCA period after 2026; if unused during the duration of this WCA period. In order to for the carryover quantity to be included, all owners must enter into agreement to participate into a subsequent WCA by December 31st of the last year of this WCA period.

**Compliance Monitoring and Enforcement**

We, the owners, understand that the following compliance monitoring and enforcement provisions are proposed. This section also includes any specific provisions regarding measuring or reporting water usage.
There are two (2) recognized observation wells within one (1) mile of the Smith Farms WCA that have for many years been measured annually by the Kansas Geological Survey (KGS). See attached water right area map. These wells will continue to be measured annually and the data collected will help in evaluating the effectiveness of the WCA. An onsite observation well may be necessary to monitor the local water level more accurately.

We will submit an annual report no later than March 1st and maintain a spreadsheet detailing the following information for each well and all wells combined: beginning and ending meter readings, quantity of water diverted, acres irrigated, the inches per acre, and the quantity of water remaining for the first five-year period and each following five-year period. The records will be available to KDA-DWR upon request.

We will ensure backup measurements will be supported or an alternate measurement device will be available to be put into service in case the water flowmeter record for any given well is questionable or not reliable.

We acknowledge that water flowmeters within the WCA will be sealed to the measurement chamber by KDA-DWR during the duration of this management plan to ensure an accurate water use record.

We, water right owners within the Smith Farms WCA shall be responsible for ensuring the water flowmeters comply with state and local law(s). Any water right owner or authorized designee who finds a flow meter that is inoperable or inaccurate shall within 48 hours contact the KDA-DWR concerning the matter. Whenever an inoperable or inaccurate meter is repaired or replaced, the owner or authorized designee shall notify the KDA-DWR within seven (7) days on a form prescribed by the Chief Engineer of the water flowmeter installation and any water flowmeter repair or replacement event.

We acknowledge that failure to abide by the terms of this agreement may result in the termination of the WCA. Failure to abide by the terms, conditions, and limitations of the individual water rights will be subject to the civil penalties outlined in K.A.R. 5-14-10 and K.A.R. 5-14-12.

Review of Effectiveness
We acknowledge that a review of the WCA shall be completed before November 1, 2021, to ensure the above terms remain appropriate and are achieving the stated goals of the Smith Farms WCA. We understand that upon review, and a finding by the Chief Engineer that the WCA has achieved its goals and that conditions allow it to continue under the same terms for another 5-year period, the terms of the WCA may be continued as long as Smith Farms WCA is in good standing with its most recent WCA period. Should the Chief Engineer find that the terms are no longer appropriate or that no progress has been made towards the stated goal, the Chief Engineer may refuse to renew a WCA and may suggest new terms and goals. We understand that upon review, and a finding by the Chief Engineer that the WCA has achieved or made progress towards its goals and that the same terms me be included in a subsequent WCA for another designated period. The terms of the WCA may be continued as long as Smith Farms WCA is in good standing with its most recent WCA period and upon formal approval by the Chief Engineer. The Chief Engineer shall issue findings addressing the terms and goals of the existing management plan prior to any renewal of a subsequent WCA.
We acknowledge that unless terminated under the provisions below (e.g. due to the development of a LEMA), the WCA will be in effect for the listed period with an evaluation at the end of every WCA period. We understand that KDA-DWR will conduct this evaluation to ensure compliance and conservation. The evaluation will determine total water use during the WCA period.

We acknowledge that should an order of designation for a LEMA be implemented prior to end of this WCA period, an evaluation of this WCA will be conducted the year prior to the start of a LEMA. This evaluation may be used to determine an additional allocation amount of water to be carried over into a LEMA; should this be the case.

**Member addition, withdrawal, and removal**

We acknowledge that water right owners and their associated water rights and geographic boundaries may be added to the WCA upon written notification to the Chief Engineer by the owners of each enrolling water right with legal descriptions of the areas to be added. A member may withdraw from the WCA through written notification to the Chief Engineer signed by the owners of the participating water right or rights to be withdrawn from the WCA.

If the addition or withdrawal of water rights requires modification to the water allocation quantities, geographical boundaries, places of use, terms, or conditions of the original WCA, the management plan shall be revised to incorporate such changes and the associated consent agreement shall be reaffirmed by all parties, after opportunity for comment on the proposed revisions by the applicable GMD.

**Termination**

We acknowledge the Smith Farms WCA agreement may be terminated by written notification, signed by all then-existing members of the WCA, to the Chief Engineer of the intent to terminate.

We also acknowledge that the Chief Engineer may terminate this WCA upon findings that it is not being upheld to its terms. Such termination shall give notice and require a full evaluation of the WCA and water rights associated to ensure follow up actions.

**State Law**

We acknowledge that the Smith Farms WCA is subject to compliance with all other applicable state laws.

**Notification to Nearby Owners**

We acknowledge that, by statute, the Chief Engineer is required to provide written notification to all water right owners with a point of diversion within ½ of a mile, or farther if deemed necessary, by a rule and regulation of the Chief Engineer, of the boundaries of this WCA.

**Assurances**

We acknowledge this WCA will not alter the terms, conditions and limitations of the base water rights.
Review of Other Applicable Requirements
We acknowledge that upon review, the Smith Farms WCA management plan was found to effect equal or greater overall conservation than applicable GMD regulations, LEMA, and IGUCA requirements.

Participant's Agreement
By signing below, we, the water right owners, agree that this Water Conservation Area Management Plan is fair and equitable. This management plan, provided to the Chief Engineer and water right owners, is the expressed written intent of the parties and the whole agreement between the parties. We, the water right owners agree to be bound by all the terms contained in this WCA Management Plan and understand that the provisions of this agreement shall be construed to give effect to the provisions listed. We, the water right owners also agree that this management plan is the basis for a consent agreement among the Chief Engineer and the undersigned water right owners, and therefore any order and consent agreement issued by the Chief Engineer, designating the R&R Unruh Farms WCA, shall be binding upon all parties as the necessary formal implementation of this management plan.

FOR THE PARTICIPANTS: All participating water right owner(s) signing below, affirm their approval of this WCA Management Plan and if approved by the Chief Engineer allow consent to the Chief Engineer to formally approve the designation of this Water Conservation Area, described herein, by means of a Consent Agreement and Order.
